pressing importance in today's globalized community. By giving voice to educators committed to excellence in teaching from primary school to university, the book introduces the reader to a plurality of approaches to and applications of up-to-date theories in the fields of cognition, language acquisition, intercultural communication, and technology-based distance education, to name but a few. Though situated in a concrete educational context, be it a Chinese EFL classroom in transition, an online MBA course offered in post-Communist Romania, or a U.S. university utilizing community elders as a pedagogical tool, each paper was selected on the universal value of its findings, which professionals facing the challenges of 21st-century pedagogy will find readily applicable in classrooms worldwide. Since teaching paradigms are strongly culture-bound and influenced by national policies as much as international politics, this book represents a maximum of diversity by including philosophical texts, hands-on research results, and articles in the critical discourse tradition, which reflect a number of contentious issues ranging from the pros and cons of dual language classrooms to potentially racist literature curricula and the intersection of politics and pedagogy in a post-September 11 world.
