Presenting South Africa:

South Africa, Past, Present and Future Tony Binns, Alan Lester, Etienne Nel, 2014-09-25 This is the first book to combine a discussion of post apartheid development initiatives with an extended historical analysis of South Africa's dynamic race class gender and ethnic identities Bringing together the research of an historical geographer and two development geographers the book enables us to locate the post apartheid transition in a broad historical and spatial perspective Within this perspective the limitations as well as the achievements of South Africa's current transformation are highlighted *South African Digest*, 1964

Archaeology and Economic Development Paul Burtenshaw, 2017-12-02 Nowhere in archaeology is the gap between theory and practice more evident than in its ambivalent engagement with economic development This groundbreaking volume assembles practicing archaeologists economists and NGO officials in an extensive exploration of the theoretical practical and ethical issues raised by archaeologists use of cultural heritage to support economic development The first chapters consider the problem of articulating the value of tangible and intangible heritage when economic measures alone are inadequate Subsequent chapters present regional perspectives on archaeology and development and present a host of case studies from around the globe that describe archaeologists development projects including some that are successful and others that are less so These studies both suggest best practices in the implementation of development projects and illuminate the obstacles to success created by political conflict and competing human needs Ethical issues and practical considerations converge in chapters that explore the role that members of local communities should play in the design management and governance of archaeological and heritage resources In this volume archaeologists and heritage professionals will encounter a thought provoking international discourse concerning the path forward for archaeology as the field engages with economic development
