William Oldnall Russell

Preserving The Person:

Thinking with Kierkegaard Arne Grøn, 2022-12-31 Arne Grøn's reading of Søren Kierkegaard's authorship revolves around existential challenges of human identity. The 35 essays that constitute this book are written over three decades and are characterized by combining careful attention to the augmentative detail of Kierkegaard's text with a constant focus on issues in contemporary philosophy. Contrary to many approaches to Kierkegaard's authorship, Grøn does not read Kierkegaard in opposition to Hegel. The work of the Danish thinker is read as a critical development of Hegelian phenomenology with particular attention to existential aspects of human experience. Anxiety and despair are the primary existential phenomena that Kierkegaard examines throughout his authorship, and Grøn uses these negative phenomena to argue for the basically ethical aim of Kierkegaard's work. In Grøn's reading, Kierkegaard conceives human selfhood not merely as relational but also a process of becoming the self that one is through the otherness of self-experience that is the body, the world, other people, and God. This book should be of interest to philosophers, theologians, literary studies scholars, and anyone with an interest not only in Kierkegaard but also in human identity. *The Great Art of Government* Peter Josephson, 2002 Moving beyond previous scholarship, he gives us a Locke as much concerned with the effective functioning of government as with the roots of its moral legitimacy. **BOOK JACKET** Consolidated Laws of the Colony of British Honduras British Honduras, 1887

Computer Vision -- ECCV 2010 Kostas Daniilidis, Petros Maragos, Nikos Paragios, 2010-08-30 The six volume set comprising LNCS volumes 6311 until 6313 constitutes the refereed proceedings of the 11th European Conference on Computer Vision ECCV 2010 held in Heraklion, Crete, Greece, in September 2010. The 325 revised papers presented were carefully reviewed and selected from 1174 submissions. The papers are organized in topical sections on object and scene recognition, segmentation and grouping, face, gesture, biometrics, motion and tracking, statistical models and visual learning, matching, registration, alignment, computational imaging, multi-view geometry, image features, video and event characterization, shape representation and recognition, stereo, reflectance, illumination, color, medical image analysis. **The Concept of History** Dmitri Nikulin, 2017-01-26 The Concept of History reflects on the presuppositions behind the contemporary understanding of history that often remain implicit and not spelled out. It is a critique of the modern understanding of history that presents it as universal and teleological, progressively moving forward to an end. Although few contemporary philosophers and historians maintain the view that there is strict universality and teleology in history, the remnants of these positions still affect our understanding of history. But if history is not universal and singular, evolving toward an objective universal end, it should be possible to admit of multiple histories, some of which we appropriate as our own. Another important aspect of this book is that it provides an account of history that is itself both historical and rooted in attempts to narrate and explain history from its inception in antiquity. The book seeks to establish features or constituents of history that might be found in any historical account and might themselves be considered historical invariants in history. **Preserving**
