Preservation and Valuation of Biological Resources Gordon H. Orians, 1990 Knowledge Preservation and Curation Margie Foster, Hossein Arvand, Hugh T. Graham, Denise Bedford, 2023-12-01 In order to achieve its full value knowledge must flow and be continuously used Knowledge use reuse and repurposing has been a challenge discussed in knowledge sciences literature for over three decades The authors investigate and offer solutions to two key challenges how to preserve and curate knowledge *Something's Gotta Give* Beth R. Bernhardt, Leah H. Hinds, Katina P. Strauch, 2012-10-15 The theme of the 2011 Charleston Conference the annual event that explores issues in book and serial acquisition was Something s Gotta Give The conference held November 2 5 2011 in Charleston SC included 9 pre meetings more than 10 plenaries and over 120 concurrent sessions The theme reflected the increasing sense of strain felt by both libraries and publishers as troubling economic trends and rapid technological change challenge the information supply chain What part of the system will buckle under this pressure Who will be the winners and who will be the losers in this stressful environment The Charleston Conference continues to be a major event for information exchange among librarians vendors and publishers As it begins its fourth decade the Conference is one of the most popular international meetings for information professionals with almost 1 500 delegates Conference attendees continue to remark on the informative and thought provoking sessions The Conference provides a collegial atmosphere where librarians vendors and publishers talk freely and directly about issues facing libraries and information providers In this volume the organizers of the meeting are pleased to share some of the learning experiences that they and other attendees had at the conference **MMOs from the Outside In** Richard A. Bartle, 2015-12-30 This follow up volume to *MMOs from the Inside Out* is a further collection of bold ideas information and instruction from one of the true pioneers of Massively Multiplayer Online Role Playing Games Whereas its predecessor looked at how MMOs can change the world *MMOs from the Outside In* How Psychology Law Culture and Real Life see Massively Multiplayer Role playing Games looks at how the world can change MMOs and not always for the better The aim of this book is to inform an up coming generation of designers to alert and educate players and designers to be and to caution those already working in

the field who might be growing complacent about society's acceptance of their chosen career. Playing and creating MMOs does not happen in a bubble. MMOs are so packed with potential that those who don't understand them can be afraid and those who do understand them can neglect their wider impact. Today's examples are little more than small pioneering colonies on the shore of a vast uncharted continent. What monsters lurk beyond the horizon? What horrors will explorers bring back to torment us? MMOs from the Outside In is for people with a spark of curiosity; it pours gasoline on that spark. It explains how MMOs are perceived, how they could and perhaps should be perceived, and how they can contribute to wider society. Delves into what researchers think about why players play. Encourages, enthuses, enrages, engages, enlightens, envisions, and enchants. Doesn't tell you what to think; it tells you to think. What You Will Learn: The myriad challenges facing MMOs and to decide for yourself how to address these challenges. What MMOs bring to the world that it didn't have before. How MMOs are regarded and what this means for how they will be regarded in the future. That playing and designing MMOs has implications for those who don't play or design them. Whom This Book is For: MMOs from the Outside In is a book for those who wish to know more about the wider influence of game design in general and MMO design in particular. It's for people who play MMOs, for people who design MMOs, and for people who study MMOs. It's for people with a yearning to see beyond the worlds of their imagination and to change the world around them.

Raisinghani, Mahesh S., 2008-01-31. Includes the most important issues, concepts, trends, and technologies in the field of global information technology management, covering topics such as the technical platform for global IS applications, information systems projects spanning cultures, managing information technology in corporations, and global information technology systems and socioeconomic development in developing countries. *Endangerment, Biodiversity and Culture*

Fernando Vidal, Nélia Dias, 2015-06-19. The notion of Endangerment stands at the heart of a network of concepts, values, and practices dealing with objects and beings considered threatened by extinction, and with the procedures aimed at preserving them. Usually animated by a sense of urgency and citizenship, identifying endangered entities involves evaluating an impending threat and opens the way for preservation strategies. *Endangerment, Biodiversity and Culture* looks at some of the fundamental ways in which this process involves science, but also more than science: not only data and knowledge and institutions, but also affects and values. Focusing on an endangerment sensibility, it encapsulates tensions between the normative and the utilitarian, the natural and the cultural. The chapters situate that specifically modern sensibility in historical perspective and examine central aspects of its recent and present forms. This timely volume offers the most cutting-edge insights into the Environmental Humanities for researchers working in Environmental Studies, History, Anthropology, Sociology, and Science and Technology Studies.
