Preventive Medicine In World War II Volume 5:

Preventive medicine in World War II. 1960 v. 5 United States. Army Medical Service, 1960 **The First Miracle Drugs** John E. Lesch, 2006-10-12 In the decade from 1935 1945 while the Second World War raged in Europe a new class of medicines capable of controlling bacterial infections launched a therapeutic revolution that continues today The new medicines were not penicillin and antibiotics but sulfonamides or sulfa drugs The sulfa drugs preceded penicillin by almost a decade and during World War II they carried the main therapeutic burden in both military and civilian medicine Their success stimulated a rapid expansion of research and production in the international pharmaceutical industry raised expectations of medicine and accelerated the appearance of new and powerful medicines based on research The latter development created new regulatory dilemmas and unanticipated therapeutic problems The sulfa drugs also proved extraordinarily fruitful as starting points for new drugs or classes of drugs both for bacterial infections and for a number of important non infectious diseases This book examines this breakthrough in medicine pharmacy and science in three parts Part I shows that an industrial research setting was crucial to the success of the revolution in therapeutics that emerged from medicinal chemistry Part II shows how national differences shaped the reception of the sulfa drugs in Germany France Britain and the United States The author uses press coverage of the day to explore popular perceptions of the dramatic changes taking place in medicine Part III documents the impact of the sulfa drugs on the American effort in World War II It also shows how researchers came to an understanding of how the sulfa drugs worked adding a new theoretical dimension to the science of pharmacology and at the same time providing a basis for the discovery of new medicinal drugs in the 1940s 1950s and 1960s A concluding chapter summarizes the transforming impact of the sulfa drugs on twentieth century medicine tracing the therapeutic revolution from the initial breakthrough in the 1930s to the current search for effective treatments for AIDS and the new horizons opened up by the human genome project and stem cell research **Preventive Medicine in World War II. Department of Printed Books, 1959 **Military Review** , 1996 *The Lancet* , 1945 **Recasting Race After World War II** Timothy L. Schroer, 2007 Historian Timothy L Schroer s Recasting Race after World War II explores the renegotiation of race by Germans and African American GIs in post World War II Germany Schroer dissects the ways in which notions of blackness and whiteness became especially problematic in interactions between Germans and American soldiers serving as part of the victorious occupying army at the end of the war The segregation of U S Army forces

fed a growing debate in America about whether a Jim Crow army could truly be a democratizing force in postwar Germany
 Schroer follows the evolution of that debate and examines the ways in which postwar conditions necessitated reexamination
 of race relations He reveals how anxiety about interracial relationships between African American men and German women
 united white American soldiers and the German populace He also traces the importation and influence of African American
 jazz music in Germany illuminating the subtle ways in which occupied Germany represented a crucible in which to recast the
 meaning of race in a post Holocaust world Recasting Race after World War II will appeal to historians and scholars of
