## **Realism And Explanatory Priority:**

*Realism and Explanatory Priority* J. Wright, 1997-04-30 One of the central areas of concern in late twentieth century philosophy is the debate between Realism and anti Realism But the precise nature of the issues that form the focus of the debate remains controversial In *Realism and Explanatory Priority* a new way of viewing the debate is developed The primary focus is not on the notions of existence truth or reference but rather on independence A notion of independence is developed using concepts derived from the theory of explanation It is argued that this approach enables us to clarify the exact nature of the empirical evidence that would be required to establish Realism in any area The author defends a restricted form of Realism which he calls Nomic Structuralism The book will be suitable for professional philosophers of language science and metaphysics and their graduate students

**Essays in Quasi-realism** Simon Blackburn, 1993 This volume collects together the author's pioneering essays on quasi realism a philosophical position he first introduced in 1980 which has become a distinctive and much discussed option in metaphysics and ethics

*The Oxford Handbook of Metaphor in Organization Studies* Anders Örtengren, 2024 The Oxford Handbook of Metaphor in Organization Studies provides a comprehensive reference for researchers educators and managers The book comprises twenty nine chapters which are authored by over forty contributors many of whom have played major roles in the development of the field over the years

*The Routledge Handbook of Philosophy of Colour* Derek H. Brown, Fiona Macpherson, 2020-09-27 From David Hume's famous puzzle about the missing shade of blue to current research into the science of colour the topic of colour is an incredibly fertile region of study and debate cutting across philosophy of mind epistemology metaphysics and aesthetics as well as psychology Debates about the nature of our experience of colour and the nature of colour itself are central to contemporary discussion and argument in philosophy of mind and psychology and philosophy of perception This outstanding Handbook contains 29 specially commissioned contributions by leading philosophers and examines the most important aspects of philosophy of colour It is organized into six parts The Importance of Colour to Philosophy The Science and Spaces of Colour Colour Phenomena Colour Ontology Colour Experience and Epistemology Language Categories and Thought The Routledge Handbook of Philosophy of Colour is essential reading for students and researchers in philosophy of mind and psychology epistemology metaphysics and aesthetics as well as for those interested in conceptual issues in the psychology of colour

*Realistic Evaluation* Ray Pawson, Nicholas Tilley, 1997-04-23 *Realistic Evaluation* shows how program evaluation needs to be and can be bettered It presents a profound yet highly readable critique of current evaluation practice and goes on to introduce a manifesto and handbook for a fresh approach The main body of this book is devoted to the articulation of a new evaluation paradigm which promises greater validity and utility from the findings of evaluation studies The authors call this new approach realistic evaluation The name reflects the paradigm's foundation in scientific realist philosophy its commitment to the idea that programmes deal with real problems rather than mere social constructions and its primary

intention which is to inform realistic developments in policy making that benefit programme participants and the public Ray Pawson and Nicholas Tilley argue with passion that scientific evaluation requires a careful blend of theory and method quality and quantity ambition and realism The book offers a complete blueprint for evaluation activities running from design to data collection and analysis to the cumulation of findings across programmes and onto the realization of research into policy The argument is developed using practical examples throughout and is grounded in the major fields of programme evaluation This book will be essential reading for all those involved in the evaluation process especially those researchers students and practitioners in the core disciplines of sociology social policy criminology health and education This book is a must for those engaged in the field providing a fully illustrated text on evaluation with numerous examples from the criminal justice system Unusually it offers something for the academic practitioner and student alike I found Pawson and Tilley's latest work on evaluation an enjoyable and informative read For myself their realistic evaluation clarified and formalised a jumbled set of ideas I had already been developing Although not everyone will agree with the methodology proposed by the authors this book is a valuable read as it will cause most of us at least to review our methodological stance International Journal of Police Science and Management This is an engaging book with a strong sense of voice and communicative task The voice is sometimes strident but always clear Its communicative qualities are evident equally in its structure lots of signposting for the reader within and across chapters Language Teaching Research This provocative elegant and highly insightful book focuses on the effective incorporation of actual practice into the formulation of evaluation methodology What a pleasure to read sentences like The research act involves learning a stakeholder's theories formalizing them and teaching them back to that informant who is then in a position to comment upon clarify and further refine the key ideas Pawson and Tilley have given us a wise witty and persuasive account of how real practitioner experience might be encouraged to intrude on and modify researchers' concepts about program processes and outcomes This holds important promise for achieving something that is devoutly to be wished closer interaction among at least some researchers and some policy makers Eleanor Chelimsky Past President of the American Evaluation Association This is a sustained methodological argument by two wordly wise social scientists Unashamedly intellectual theoretically ambitious yet with a clear but bounded conception of evaluation It is articulate occasionally eloquent and always iconoclastic whilst eschewing paradigm wars The Pawson and Tilley realist call to arms threatens to take no prisoners among experimentalists constructivists or pluralists It is the kind of book that clarifies your thoughts even when you disagree with everything they say Elliot Stern The Tavistock Institute *Meta-ethics, Moral Objectivity and Law* Veronica Rodriguez-Blanco, 2004 The book shows the relevance of meta ethical and metaphysical considerations to determine the nature of law and the connection between objective moral and legal judgements The investigation analyses the legal theories of Ronald Dworkin Jürgen Habermas and Michael Moore The conclusion of the scrutiny is that the discussed views fail to explain the plausible links between objective moral and legal judgements The

lesson to learn from the failure of these philosophical perspectives is that we need to revise fundamental meta ethical conceptions within law In addition to the view that meta ethical and metaphysical considerations play a central role in our understanding of objective moral and legal judgements we enforce the idea that it is necessary to revise our meta ethical and metaphysical premises in jurisprudence Epistemic and meta ethical abstinence in legal theory in this way is challenged by a number of criticisms The outcome of our reflection is that in legal theory as in many other disciplines we need to take truth and objectivity seriously *Oxford Studies in Metaethics* Russ Shafer-Landau,2010 **Reports on Philosophy** ,1998
