New Age Religion and Western Culture Wouter J. Hanegraaff,2018-09-24 Recent years have seen a spectacular rise of the New Age movement and an ever increasing interest in its beliefs and manifestations This fascinating work presents the first ever comprehensive analysis of New Age Religion and its historical backgrounds thus providing the reader with a means of orientation in the bewildering variety of the movement Making extensive use of primary sources the author thematically analyses New Age beliefs from the perspective of the study of religions While looking at the historical backgrounds of the movement he convincingly argues that its foundations were laid by so called western esoteric traditions during the Renaissance Hanegraaff finally shows how the modern New Age movement emerged from the increasing secularization of those esoteric traditions during the 19th century This ground breaking publication is compulsive reading for all those involved or interested in the New Age movement

Charles Darwin and the Church of Wordsworth Robert M. Ryan,2016 Charles Darwin and the Church of William Wordsworth is a study of the cultural connections between two of the nineteenth

century's most influential figures Charles Darwin and William Wordsworth. When Darwin published *On the Origin of Species*, his reading public's affective response to the natural world had already been profoundly influenced by William Wordsworth. Wordsworth presented nature as benign, harmonious, a source of moral inspiration and spiritual blessing and a medium through which one might enter into communion with the Divine. Long after his death, he continued to be revered throughout the English-speaking world not only as a great poet but as a theologian with a broader following than any prelate and an appeal that transcended or ignored sectarian differences. For believers and skeptics alike, Wordsworth's poetry offered a readily accessible and intellectually respectable counterweight to Darwin's vision of a material universe evolving by fixed laws in which Divinity played no discernible role and where concepts like beauty and harmony were material conditions to be explained in scientific terms. Wordsworth's theology of nature became for many readers a more effective counterforce to Darwin's ideas than Biblical orthodoxy, but it also provided an enriching context for the reception of evolutionary theory, aiding theists in their effort to reach an accommodation with the new science. As the nineteenth century's two most prominent theoreticians of nature's life, Wordsworth and Darwin competed for attention among those seeking to understand humanity's relationship with the natural world, and their disciples engaged in a productive, mutually transformative dialogue in which the poet's cultural authority influenced the way Darwin was received and Darwinian science adjusted interpretation and evaluation of the poetry. Charles Darwin and the Church of William Wordsworth explores the broad cultural relationship between Wordsworth, Darwin, and their disciples, contextualizing them within wider discussions about the relationship between religion and science in the nineteenth century.

The Analogy of Love Gary Chartier, 2015-11-09. This book offers an overview of Christian theology organized around the twin themes of divine and human love. The book covers the traditional theological topics as well as basic questions of theological method. It seeks to integrate a focus on love throughout. While love is regularly canvassed as a dominant theme in Christian thought, it has rarely been the focus of Christian theological construction or a constraint on theological formulation. The book seeks to suggest, chapter by chapter, how a given topic relates to the broad theme of love. The book is written in a way designed to make it accessible to university students and educated laypersons. At the same time, it takes positions on controverted scholarly issues, and the methodological approach outlined at the beginning will be of interest to academic theologians.

The Self-destruction of the West Damien François, 2007. Voilà d'ormais plus de 10 000 ans que la civilisation occidentale s'est installée et voilà 10 000 ans qu'elle viole le sens même de la nature, la vie. En s'appropriant sans concession ce qui l'entourait, l'homme de l'Ouest a vu son horizon ployer sous la charge de la destruction qu'il lui avait lui-même réalisée. Sommes-nous des lycanthropes ou des vampires? Ces monstres si terrifiants qui sortent de notre imagination sont-ils en réalité la copie de notre comportement d'ivrogne? Prétendons-nous sans remords les énergies qui nous entourent? Jusqu'où ira-t-on? *New Age Journal*, 1991. *Nature's Web* Peter H. Marshall, 1992.
