## **Rebuilding The Royal Navy:**

Rebuilding the Royal Navy D. K. Brown, George Moore, 2012 The RN fleet in 1945 was enormous but it was old and worn out and Britain faced austerity and a reduced world role In addition new threats and technologies rendered even the most recent ships obsolescent How designers responded to these unprecedented challenges is the central theme of this book and it covers the ambitious plans for the conversion or replacement of the bigger ships and looks at all the new construction from aircraft carriers through destroyers and frigates to submarines including nuclear and strategic to minesweepers and small craft Back cover

**Rebuilding the Royal Navy** David K. Brown, George Moore, 2003 An authoritative design history of postwar British warship development based on both declassified documentation and personal experience In this fourth and final volume in his bestselling series on Royal Navy warship development David K Brown tackles the period in which he himself worked as a Naval Constructor However for this book his personal knowledge and experience is augmented by George Moore s in depth archival research on the substantial body of material declassified in recent years Although the fleet was enormous in 1945 much was old and worn out while Britain faced economic austerity and a reduced world role At the same time new threats and novel technologies rendered even the newer ships obsolescent How British designers responded to these unprecedented challenges is one of the central themes of the book After considering the wartime legacy the book moves on to cover some of the ambitious ideas for replacement or conversion of the bigger ships most of which were stifled by lack of funds But most of the book is devoted to new construction with chapters on all the major categories from aircraft carriers through destroyers and frigates to submarines including nuclear and strategic minesweepers and small craft Each contains new information on unbuilt designs and identifies many innovations and analyses the impact of the Falklands War David K Brown had an eminent career as a warship designer with the Royal Corps of naval Constructors He has published widely on historical and professional topics and his books include *Warrior to Dreadnought* *The Grand Fleet* and *Nelson To Vanguard* George Moore devotes his time to naval research and has completed a major study of wartime naval building programmes **SELLING POINTS** Last volume of a successful and highly praised series that began with *From Warrior to Dreadnought* The only design history of modern British warships with inside information and insight New drawings of never before seen abortive designs

**The Royal Navy in the Cold War Years, 1966-1990** Edward Hampshire, 2024-07-30 During the period covered by this new book the Royal Navy faced some of its greatest challenges both at sea confronting the increasingly capable and impressive Soviet Navy and on shore when it faced policy crises that threatened the survival of much of the fleet During this remarkable period the Navy had rarely been so focussed on a single theater of war the Eastern Atlantic but also rarely so politically vulnerable The author sets out to analyze shadowing operations and confrontations at sea with Soviet ships and submarines the Navy s role in the enormous NATO and Warsaw Pact naval exercises that acted out potential war scenarios individual operations from the Falklands and the 1990 91 Gulf War to the Beira and Armilla patrols

the development of advanced naval technologies to counter Soviet capabilities policy making controversies as the three services fought for resources including the controversial 1981 Nott defense review and what life was like in the Cold War navy for ratings and officers The book the first to cover this subject in depth for more than thirty years will make use of the full range of archival sources that have been publicly available over the last two decades but of which little use has been made by historians This work is destined to become a definitive naval history of the period and also provide a fascinating and gripping narrative of a navy under threat from many directions but which survived and eventually prospered winning a remarkable victory in the far South Atlantic more than 7 000 miles from its expected battleground in the North Atlantic Elegantly written for a wide audience it will be a very significant volume for professional and enthusiast alike *A History of the Administration of the Royal Navy and of Merchant Shipping in Relation to the Navy* Michael Oppenheim,1896 The British Navy and the State in the Eighteenth Century Clive Wilkinson,2004 Prominent in building Britain's maritime empire in the eighteenth century the Royal Navy also had a significant impact on politics public finance and the administrative and bureaucratic development of the British state The Navy was the most expensive branch of the state and its effective funding and maintenance was a problem that taxed the ingenuity of a succession of politicians naval officers and bureaucrats The Navy in many ways a victim of its own success grew faster than the infrastructure that supported it and the public purse that funded it By the middle of the century the difficulties this growth created had become critical and the challenge this presented was taken up by Admiralty Boards led by Anson Egmont Hawke and Sandwich Resolving these problems introduced administrative reforms and innovations in the Navy's administration and in public finance some of which prefigured later bureaucratic development There was however a political price to pay when the management of the Navy and its apparent unpreparedness for the War of American Independence made the Earl of Sandwich and the Navy a focus for political opposition to an unpopular government and a disappointing war BOOK JACKET All about the Royal Navy Sir William Laird Clowes,1891 **The British Navy and the Use of Naval Power in the Eighteenth Century** Jeremy Black,Philip Woodfine,1988 Artikelsamling om den britiske flåde i det 18 rhundrede Omhandler bl.a. flådens anvendelse i forskellige krige og til beskyttelse af den britiske handel den politiske administration af flåden og den britiske flådes diplomatiske bestræbelser ved det svenske hof under Napoleonskrigene **British Naval Documents, 1204-1960** Navy Records Society (Great Britain),1993 To celebrate its centenary in 1993 the Society produced a special volume covering seven hundred and fifty years of British naval history containing 535 documents carefully selected by leading experts See the contents of British Naval Documents 1204 1960 The British navy: its strength, resources and administration. [2 eds. of vol. 3]. Thomas Brassey (1st earl.),1883 *Naval History* ,2005 **The British Navy** Earl Thomas Brassey Brassey,1883 The British Navy Thomas BRASSEY (Earl Brassey.),1882 **The British Battleship 1906-1946** Norman Friedman,2015-09-30 The British battleship is one of the most intensely studied of all naval topics but it is also among the

most popular Norman Friedman is one of the most highly regarded of all naval writers with an avid following for his work. Therefore a new book on British battleships by Friedman is a major event and has been eagerly awaited ever since knowledge of the project began to circulate among enthusiasts. Friedman has the ability to bring new ideas to even the most over-worked subjects based on extensive original research and a talent for explaining technology in the wider context of politics, economics and strategy. His latest book covers the development of Royal Navy capital ships including battlecruisers from the pre-history of the revolutionary Dreadnought of 1906 to the last of the line HMS Vanguard in 1946. Replete with original insights, the story that emerges will enlighten and surprise even the most knowledgeable. The attraction of the book is enhanced by sets of specially commissioned plans of the important classes by John Roberts and A D Baker III, both renowned experts in their own right, plus a colour section featuring the original Admiralty draughts including a spectacular double gatefold. For many with an interest in warships this will be the book of the year.
