

Naturally Repair Wood With Vinegar and Canola Oil. So, for a super cheap, use  $\frac{3}{4}$  cup of oil, add  $\frac{1}{4}$  cup vinegar, white or apple cider vinegar, mix it in a jar, then rub it into the wood. You don't need to wipe it off; the wood just soaks it in.

*The Gender Factory* S.F. Berk, 2012-12-06 tion addressed by this analysis centers on the reciprocal relation between 1 household domestic and market work efforts It should be obvious by now that this chapter is not concerned explicitly with the contributions of individual members to household or market activity nor does it examine the mechanisms by which work tasks or time is apportioned among them To reiterate households per se are the unit of analysis the division of labor within with respect to either household or market activities is ignored In this chapter one must pretend that the social relations within the household productive unit which critically shape both the nature of work and its allocation are hidden from view To return to the earlier metaphor households establish a total household pie made up of all the market and domestic chores that they will undertake and the time required for them Only after that pie is created can it be sliced and the pieces doled out to individual members 2 The household and market pie defined and described here can be roughly conceptualized as the total productive capacity of

the household or as the result of a pooling of individual talents and resources. Indeed, the measure of the time available for leisure incorporated into the measure of the pie, the household's full income budget constraint, is the total productive potential of the household could be described.
