A Sand County Almanac Aldo Leopold, 1968-12-31 First published in 1949 and praised in The New York Times Book Review as a trenchant book full of vigor and bite A Sand County Almanac combines some of the finest nature writing since Thoreau with an outspoken and highly ethical regard for America's relationship to the land Written with an unparalleled understanding of the ways of nature the book includes a section on the monthly changes of the Wisconsin countryside another part that gathers informal pieces written by Leopold over a forty year period as he traveled through the woodlands of Wisconsin Iowa Arizona Sonora Oregon Manitoba and elsewhere and a final section in which Leopold addresses the philosophical issues involved in wildlife conservation *A Sand County Almanac* Aldo Leopold, 1976 Presents a collection of nature writings by Aldo Leopold one of the foremost conservationists of the early twentieth century **A Sand County almanac. Environmental Virtue Ethics Philip Cafaro, Ronald Sandler, 2005-02-04 There is one certainty regarding the human relationship with nature there is no getting away from it But while a relationship with nature is a given the nature of that relationship is not Environmental ethics is the attempt to determine how we ought and ought not relate to the natural environment A complete environmental ethic requires both an ethic of action and an ethic of character Environmental virtue ethics is the area of environmental ethics concerned with character It has been an underappreciated and underdeveloped aspect of environmental ethics until now The selections in this collection consisting of ten original and four reprinted essays

by leading scholars in the field discuss the role that virtue and character have traditionally played in environmental discourse and reflect upon the role that it should play in the future. The selections also discuss the substantive content of the environmental virtues and vices and apply them to concrete environmental issues and problems. This collection establishes the indispensability of environmental virtue ethics to environmental ethics. It also enhances the breadth and quality of the ongoing discussion of environmental virtue and vice and the role they should play in an adequate environmental ethic.

Fortschritte der Naturzerstörung Rolf Peter Sieferle, 1988 Thinking Like a Planet J. Baird Callicott, 2014-01-06
Bringing together ecology, evolutionary moral psychology and environmental ethics, J. Baird Callicott counters the narrative of blame and despair that prevails in contemporary discussions of climate ethics and offers a fresh, more optimistic approach. Whereas other environmental ethicists limit themselves to what Callicott calls Rational Individualism in discussing the problem of climate change, only to conclude that essentially there is little hope that anything will be done in the face of its perfect moral storm, in Stephen Gardiner's words, Callicott refuses to accept this view. Instead, he encourages us to look to the Earth itself and consider the crisis on grander spatial and temporal scales as we have failed to in the past. Callicott supports this theory by exploring and enhancing Aldo Leopold's faint sketch of an Earth ethic in *Some Fundamentals of Conservation*, in the Southwest, a seldom-studied text from the early days of environmental ethics that was written in 1923 but not published until 1979 after the environmental movement gathered strength. *A Fierce Green Fire* Marybeth Lorbiecki, 2016-03-11
For anyone interested in wildlife, birds, wilderness areas, parks, ecology, conservation, environmental literature and ethics, the name Aldo Leopold is sure to pop up. Since first publication, Aldo Leopold's *A Fierce Green Fire* has remained the classic, short, inspiring biography of Leopold, the perfect companion to reading his ever-popular *A Sand County Almanac*. Winning numerous awards, this comprehensive account of his life story is dynamic and readable, written in the context of the history of American conservation and illustrated with historic photographs. Marybeth Lorbiecki has now enriched *A Fierce Green Fire* in a way no other biography on Leopold has, adding numerous chapters on the ripple effects of his ideas, books, ecological vision, land ethic and Shack, as well as of the ecological contributions of his children, graduate students, contemporary scholars and organizations, and the wilderness lands he helped preserve. Lorbiecki weaves these stories and factual information into the biography in a compelling way that keeps both lay and academic readers engaged. In the introduction to this edition, Lorbiecki makes it clear how much better our lives are because Leopold lived and why today we so radically need what he left us to bring about paradigm shifts in our ethical, economic and cultural thinking. Instead of losing relevance, Leopold's legacy has gained ever more necessity and traction in the face of contemporary national and world challenges such as species loss and climate change. Even the phenological studies he started at as a hobby are proving valuable, showing the climatic shifts that have occurred at the Shack lands since the 1930s, recognized by the plants and animals. *Gaither's Dictionary of Scientific Quotations* Carl C. Gaither, Alma E. Cavazos-Gaither, 2012-01-04
