

39. Santa Claus Comes To-Night.

E. E. HEWITT.

E. S. LORENZ.

Several good voices.

Whole Class.

1. Hang the stockings in a row, Santa Claus comes to-night!
2. He loves children that o-bey, Santa Claus comes to-night!
3. Do you know his other name? Santa Claus comes to-night!
4. Do you think he's almost here? Santa Claus comes to-night!

He'll put something in we know, Santa Claus comes to-night.
Kind and truthful ev-'ry day, Santa Claus comes to-night.
Call him Love: 'tis just the same, Santa Claus comes to-night.
Bells are ringing, sweet and clear, Santa Claus comes to-night.

CHORUS.

Hear the children laugh and sing, Till the ver-y raft-ers ring,

Waiting for the merry, merry King; Santa Claus comes to-night.

Santa Claus Will Come Tonight:

Knowledge, Language and Logic: Questions for Quine A. Orenstein, P. Kotatko, 2012-12-06 Quine is one of the twentieth century's most important and influential philosophers. The essays in this collection are by some of the leading figures in their fields and they touch on the most recent turnings in Quine's work. The book also features an essay by Quine himself and his replies to each of the papers. Questions are raised concerning Quine's views on knowledge, observation, holism, truth, naturalized epistemology, about language, meaning, the indeterminacy of translation, conjecture, and about the philosophy of logic, ontology, singular terms, vagueness, identity, and intensional contexts. Given Quine's preeminent position, this book must be of interest to students of philosophy in general, Quine aficionados, and most particularly to those working in the areas of epistemology, ontology, philosophies of language, of logic, and of science.

Contemporary Research in Philosophical Logic and Linguistic Semantics D.J. Hockney, W.L. Harper, B. Freed, 2012-12-06 In 1973 a workshop was held at The University of Western Ontario on topics of common interest to philosophers and linguists. This volume contains most of the papers presented at the workshop. Also included are previously unpublished essays by R. Dougherty and H. Lasnik, as well as a comment on G. Lakoff's paper by B. van Fraassen. K. Donnellan's paper was presented at the workshop and subsequently appeared in *The Philosophical Review*. We thank the editors of this journal for permission to publish the paper here. The papers by D. Lewis, R. Stalnaker, G. Lakoff, B. Partee, and H. Herzberger appeared earlier in *Journal of Philosophical Logic* by arrangement of the editors with B. van Fraassen and D. Reidel Publishing Company. The editors thank the officers of The University of Western Ontario for making the workshop possible and Pauline Campbell for making the workshop work.

THE EDITORS DAVID LEWIS COUNTERFACTUALS AND COMPARATIVE POSSIBILITY In the last dozen years or so our understanding of modality has been much improved by means of possible world semantics: the project of analyzing modal language by systematically specifying the conditions under which a modal sentence is true at a possible world. I hope to do the same for counterfactual conditionals. I write $A \rightarrow C$ for the counterfactual conditional with antecedent A and consequent C. It may be read as: H, it were the case that A, then it would be the case that C, or some more idiomatic paraphrase thereof.

Oratio Obliqua, Oratio Recta François Recanati, 2000 Among the entities that can be mentally or linguistically represented are mental and linguistic representations themselves. That is, we can think and talk about speech and thought. This phenomenon is known as metarepresentation. An example is: Authors believe that people read books. In this book François Recanati discusses the structure of metarepresentation from a variety of perspectives. According to him, metarepresentations have a dual structure: their content includes the content of the object representation (people reading books) as well as the meta-part: the author's belief. Rejecting the view that the object representation is mentioned rather than used, Recanati claims that since metarepresentations carry the content of the object representation, they must be about whatever the object representation is about. Metarepresentations are fundamentally transparent because they work by simulating the

representation they are about Topics covered in this wide ranging work include the analysis of belief reports and talk about fiction world shifting opacity and substitutivity quotation the relation between direct and indirect discourse context shifting semantic pretense and deference in language and thought **Catalog of Copyright Entries** Library of Congress.
