**Seattle and the Roots of Urban Sustainability** Jeffrey Craig Sanders, 2010-08-29 Seattle often called the Emerald City did not achieve its green clean and sustainable environment easily This thriving ecotopia is the byproduct of continuing efforts by residents businesses and civic leaders alike In *Seattle and the Roots of Urban Sustainability* Jeffrey Craig Sanders examines the rise of environmental activism in Seattle amidst the urban crisis of the 1960s and its aftermath Like much activism during this period the environmental movement began at the grassroots level in local neighborhoods over local issues Sanders links the rise of local environmentalism to larger movements for economic racial and gender equality and to a counterculture that changed the social and political landscape He examines emblematic battles that erupted over the planned demolition of Pike Place Market a local landmark and environmental organizing in the Central District during the War on Poverty Sanders also relates the story of Fort Lawton a decommissioned army base where Audubon Society members and Native American activists feuded over future land use The rise and popularity of environmental consciousness among Seattle's residents came to influence everything from industry to politics planning and global environmental movements Yet as Sanders reveals it was in the small local struggles that urban environmental activism began *Magic Lands* John M. Findlay, 1993-09-22 The American West conjures up images of pastoral tranquility and wide open spaces but by 1970 the Far West was the most urbanized section of the country Exploring four intriguing cityscapes Disneyland Stanford Industrial Park Sun City and the 1962 Seattle World's Fair John Findlay shows how each created a sense of cohesion and sustained people's belief in their superior urban environment This first book length study of the urban West after 1940 argues that Westerners deliberately tried to build cities that differed radically from their eastern counterparts In 1954 Walt Disney began building the world's first theme park using Hollywood's movie making techniques The creators of Stanford Industrial Park were more hesitant in their approach to a conceptually organized environment but by the mid 1960s the Park was the nation's prototypical research park and the intellectual downtown for the high technology region that became Silicon Valley In 1960 on the outskirts of Phoenix Del E Webb built Sun City the largest most influential retirement community in the United States Another innovative cityscape arose from the 1962 Seattle World's Fair and provided a futuristic somewhat fanciful vision of modern life These four became magic lands that provided an antidote to the apparent chaos of their respective urban milieus Exemplars of a new lifestyle they are landmarks on the changing cultural landscape of postwar America Urban Environment Design Research Robert M. Eury, 1981 Detailed accounts of the organizational methods and administrative activities for urban environmental design in ten cities Savannah and Decatur Ga Charleston S C Hudson N Y Mankato Minn Pittsburgh Pa Baltimore Md Seattle Wash Los Angeles Calif and Dallas Tex **You May Have Something There** Stephen Dow Beckham, 1978 *Politics of Urban Runoff* Andrew Karvonen, 2011-08-19 A study of urban stormwater runoff that explores the relationships among nature technology and society in cities When rain falls on the city it creates urban runoff

that cause flooding erosion and water pollution Municipal engineers manage a complex network of technical and natural systems to treat and remove these temporary water flows from cities as quickly as possible Urban runoff is frequently discussed in terms of technical expertise and environmental management but it encompasses a multitude of such nontechnical issues as land use quality of life governance aesthetics and community identity and is central to the larger debates on creating more sustainable and livable cities In this book Andrew Karvonen uses urban runoff as a lens to view the relationships among nature technology and society Offering theoretical insights from urban environmental history human geography landscape and ecological planning and science and technology studies as well as empirical evidence from case studies Karvonen proposes a new relational politics of urban nature After describing the evolution of urban runoff practices Karvonen analyzes the urban runoff activities in Austin and Seattle two cities known for their highly contested public debates over runoff issues and exemplary storm water management practices The Austin case study highlights the tensions among urban development property rights land use planning and citizen activism the Seattle case study explores the city's long standing reputation for being in harmony with nature Drawing on these accounts Karvonen suggests a new relational politics of urban nature that is situated inclusive and action oriented to address the tensions among nature technology and society
