Larry E. Erickson, Gary Brase

Ev Charger Guide On Sale:

Reducing Greenhouse Gas Emissions and Improving Air Quality Larry E. Erickson, Gary Brase, 2019-11-18 The world's atmosphere is a common resource. Air quality along with energy transportation and climate change have significant impacts on our lives and this book helps readers understand the changes happening at the nexus of these areas as they relate to reducing greenhouse gas emissions and improving air quality. Discussing the transitions to electric vehicles, solar and wind energy for electricity generation, battery developments, smart grids and electric power management and progress in the electrification of agricultural technology, it also provides the latest information in the context of the United Nations sustainable development goals and the Paris Agreement on Climate Change. Features include content on how to improve urban air quality in large cities and urban environments. Effectively addresses the nexus of energy transportation, air quality, climate change and health. Discusses innovative concepts at the nexus of renewable energy, smart grid, electric vehicles and electric power management. Describes recent progress in meeting the goals of the Paris Agreement on Climate Change and the benefits of reducing greenhouse gas emissions. Written for a wide audience by world experts in sustainability. **Reducing Greenhouse Gas Emission and Improving Air Quality: Two Interrelated Global Challenges** is an invaluable book for professionals and academics at the center of changes relating to solar and wind energy, electric vehicles and charging infrastructure including government officials, community leaders, researchers, students and interested citizens. It is also an excellent text for classes that address sustainability particularly for those focused on transportation and energy.

Environment, Energy and Sustainable Development Wen-Pei Sung, Jimmy C.M. Kao, Ran Chen, 2013-12-17 **Environment Energy and Sustainable Development** brings together 242 peer reviewed papers presented at the 2013 International Conference on Frontiers of Energy and Environment Engineering held in Xiamen, China, November 28-29, 2013. The main objective of this proceedings set is to take the environment energy developments discussion a step further. Volume 1 of the set is devoted to Energy power and environmental engineering and volume 2 to Control information and applications. **Environment Energy and Sustainable Development** is intended to serve as resource material for scientists working on related topics in many disciplines including environmental science, management science and energy science and policy analysis as well as for industry professionals in the wide field of energy and environmental engineering. **Intelligent Circuits and Systems for SDG 3 - Good Health and well-being** Bhaveshkumar Choithram Dharman, Suman Lata Tripathi, 2024-08-05 ICICS is a series of conferences initiated by School of Electronics and Electrical Engineering at Lovely Professional University. Looking at the response to the conference, the bi-annual conference now onwards will be annual. The 5th International Conference on Intelligent Circuits and Systems ICICS 2023 will be focusing on intelligent circuits and systems for achieving the targets in Sustainable Development Goal SDG 3 identified as Good Health and Wellbeing by United Nations.
