Getting Ready for Phonics Judith Harries, 2013-06-20 Everyone agrees that an understanding of phonics is essential to cracking the code for reading. It focuses on the phonics debate and provides activities to support multi-sensory learning environments for the teaching of phonological development in the Foundation Stage and early Key Stage 1.

Primary English: Extending Knowledge in Practice David Wray, Jane Medwell, 2008-03-05 Still the biggest concern for many on initial teacher training courses is the acquisition of subject knowledge and the ability to translate that into effective teaching. This book addresses this building on the core subject knowledge covered in the *Achieving QTS* series and relating it to classroom practice. It supports trainees in extending and deepening their knowledge of English and demonstrating how to apply it to planning and implementing lessons. Practical and up-to-date teaching examples are used to clearly contextualize subject knowledge. A clear focus on classroom practice helps trainees to build confidence and develop their own teaching strategies.

Practice and Automatization in Second Language Research Yuichi Suzuki, 2023-08-28 Practice is a recurring and popular theme in language education. However, the concepts of practice and automatization have recently received renewed theoretical and practical interest and are increasingly being explored from the skill acquisition theory and cognitive psychology perspectives. In this volume, leading scholars discuss the optimal types, amounts, and schedules of practice for specific language structures and skills, as well as for various types of learners and learning contexts to facilitate second language development. They illuminate how practice is instantiated for specific groups of teachers and learners in diverse institutionalized contexts such as foreign language curriculum development, intelligent computer-assisted language learning systems, task-based language teaching, and study abroad. Furthermore, original methodological syntheses of extant research on practice and automatization are presented along with guides for conducting empirical research on these topics.

Practice and Automatization in Second Language Research: Perspectives from Skill Acquisition Theory and Cognitive Psychology is a valuable resource and reference for graduate students and researchers in the field of SLA and applied linguistics.

Debates in Primary Education Virginia Bower, 2020-10-19 This powerful text encourages both pre-service and established teachers, as well as teacher educators, to engage with contemporary debates in primary education. Promoting a critical approach, the chapters explore a wide range of key themes, including the importance of values in primary education and the imperative for a curriculum which embraces the whole range of available subjects. At the same time, the chapters are underpinned by a belief that children should be at the heart of all the decisions we make and that primary education should inspire a love of learning for life. The book aims to support practitioners to make informed judgements and feel confident to argue their point of view with deeper theoretical knowledge and understanding, thus increasing teacher agency and

confidence in responding to complex educational and social dilemmas such as literacy levels and rising mental health concerns Chapters encompass both the macro aspects of primary education and more specialised debates on key topics such as reading mathematics languages early years education and the use of technology With annotated further reading and reflective questions this key text is essential reading for all those wanting to develop a better understanding of the issues that shape their practice including student teachers at both undergraduate and postgraduate level practising teachers engaged in continuing professional development and teacher educators
