Reasons Muse Sexual Difference And The Birth Of Democracy:

Reason's Muse Geneviève Fraisse, 1994-05-28 The French Revolution proclaimed the equality of all human beings yet women remained less than equal in the new society The exclusion of women at the birth of modern democracy required considerable justification and by tracing the course of this reasoning through early nineteenth century texts Geneviève Fraisse maps a moment of crisis in the history of sexual difference Through an analysis of literary religious legal philosophical and medical texts Fraisse links a range of positions on women's proper role in society to specific historical and rhetorical circumstances She shows how the Revolution marked a sharp break in the way women were represented in language as traditional bantering about the war of the sexes gave way to serious discussions of the political and social meanings of sexual difference Following this discussion on three different planes the economical the political and the biological Fraisse looks at the exclusion of women against the backdrop of democracy's inevitable lie the affirmation of an equality so abstract it was impossible to concretely apply This study of the place of sexual equality in the founding moment of democracy offers insight into a persistent question whether female emancipation is to be found through the achievement of equality with men or in the celebration of female difference

Islam, Gender, and Democracy in Comparative

Perspective Jocelyne Cesari, José Casanova, 2017-04-15 The relationship between secularism democracy religion and gender equality has been a complex one across Western democracies and still remains contested When we turn to Muslim countries the situation is even more multifaceted In the views of many western commentators the question of Women Rights is the litmus test for Muslim societies in the age of democracy and liberalism Especially since the Arab Awakening the issue is usually framed as the opposition between liberal advocates of secular democracy and religious opponents of women's full equality Islam Gender and Democracy in Comparative Perspective critically re-engages this too simple binary opposition by reframing the debate around Islam and women's rights within a broader comparative literature Bringing together leading scholars from a range of disciplines it examines the complex and contingent historical relationships between religion secularism democracy law and gender equality Part One addresses the nexus of religion law gender and democracy through different disciplinary perspectives sociology anthropology political science law Part Two localizes the implementation of this nexus between law gender and democracy and provides contextualized responses to questions raised in Part One The contributors explore the situation of Muslim women's rights in minority conditions to shed light on the gender politics in the modernization of the nation and to ponder on the role of Islam in gender inequality across different Muslim countries
