## **Rebuilding The Financial System In Central And Eastern Europe 1918-1994:**

*Rebuilding the Financial System in Central and Eastern Europe, 1918-1994* Philip L. Cottrell, 2017-03-02 This collection of essays written by former bankers practising central bankers government advisers and historians celebrates the seventieth anniversary of the National Bank of Hungary From a range of view points the contributions consider the monetary and financial history of the past century and in particular explore possible parallelisms between experiences of the collapse of the Habsburg Monarchy in 1918 and of contemporary changes since 1989 The first part comprising four essays concentrates upon central banking especially the development of the National Bank of Hungary since 1878 and the establishment of the Bank of Poland Commercial banking is the theme of Part II where continuities and discontinuities are considered with respect to Austria Czechoslovakia Romania Slovenia and Yugoslavia

*Securing the World Economy* Patricia Clavin, 2015-12-03 *Securing the World Economy* explains how efforts to support global capitalism became a core objective of the League of Nations Based on new research drawn together from archives on three continents it explores how the world's first ever inter governmental organization sought to understand and shape the powerful forces that influenced the global economy and the prospects for peace It traces how the League was drawn into economics and finance by the exigencies of the slump and hyperinflation after the First World War when it provided essential financial support to Austria Hungary Greece Bulgaria and Estonia and thereby established the founding principles of financial intervention international oversight and the twentieth century notion of international development But it is the impact of the Great Depression after 1929 that lies at the heart of this history Patricia Clavin traces how the League of Nations sought to combat economic nationalism and promote economic and monetary co operation in a variety of sometimes contradictory ways Many of the economists bureaucrats and policy advisors who worked for it played a seminal role in the history of international relations and social science and their efforts did not end with the outbreak of the Second World War In 1940 the League established an economic mission in the United States where it contributed to the creation of organizations for the post war world the United Nations Organization the IMF the World Bank the UN Food and Agriculture Organization as well as to plans for European reconstruction and co operation It is a history that resonates deeply with challenges that face the Twenty First Century world

**The Lights that Failed** Zara Steiner, 2005-03-24 The peace treaties represented an almost impossible attempt to solve the problems caused by a murderous world war In *The Lights that Failed* European International History 1919-1933 part of the Oxford History of Modern Europe series Steiner challenges the common assumption that the Treaty of Versailles led to the opening of a second European war In a radically original way this book characterizes the 1920s not as a frustrated prelude to a second global conflict but as a fascinating decade in its own

right when politicians and diplomats strove to re assemble a viable European order Steiner examines the efforts that failed but also those which gave hope for future promise many of which are usually underestimated if not ignored She shows that an equilibrium was achieved attained between a partial American withdrawal from Europe and the self imposed constraints which the Soviet system imposed on exporting revolution The stabilization painfully achieved in Europe reached its fragile limits after 1925 even prior to the financial crises that engulfed the continent The hinge years between the great crash of 1929 and Hitler's achievement of power in 1933 devastatingly altered the balance between nationalism and internationalism This wide ranging study helps us grasp the decisive stages in this process In a second volume *The Triumph of the Night* Steiner will examine the immediate lead up to the Second World War and its early years

**Neuordnung im Bankwesen** Peter Melichar, 2004 Die Geschichte der Banken ist bis dato kein bevorzugter Forschungsgegenstand der Historiker obwohl die Archive und Bücher der Banken die wichtigsten Materialien zur Wirtschaftsgeschichte enthalten und die Wirtschaft selbst wie noch selten zuvor in der Geschichte die Politik zu beherrschen scheint Erstmals liegt nun basierend auf bisher unbekannten und unbearbeiteten Quellen eine Geschichte des Bankensektors und hier insbesondere der Privatbanken zwischen 1938 und 1945 sowie in den ersten Jahrzehnten der Zweiten österreichischen Republik vor Die zentralen Kapitel behandeln die Geschichte der Privatbankiers und beziehen sich dabei auf die präsentierten Fallstudien der Privatbanken die den Ausgangspunkt der Arbeit darstellen An Hand dieser 108 Privatbanken die hauptsächlich in Wien zu finden waren werden Arisierung und Liquidierung aber auch die Verfolgung und Ermordung jüdischer Bankiers dargestellt Antworten auf die Fragen nach Rückstellung speziell von entzogenen Bankkonzessionen und Entschädigung werden am Ende dieser umfangreichen Forschungen zu geben versucht Die meisten untersuchten Firmen waren kleine heute völlig unbekannte Firmen die mit wenigen Ausnahmen für Industrie Handel und Gewerbe von keinerlei Bedeutung waren sondern kleine Darlehen an Privatpersonen vergaben und teilweise die Funktion von Vermögens und Anlageberatern hatten Gerade unter den bedeutenderen und grösseren von ihnen waren einige die kaum noch Bankgeschäfte betrieben sondern vielmehr das Vermögen ihrer Eigentümer verwalteten Dazu zahlten vor allem die Bankhäuser Gebrüder Gutmann und S M v Rothschild Das Bankhaus M Thorsch Sohn stellte in dieser Hinsicht einen Extremfall dar Es hatte keinen einzigen Kunden sondern beschäftigte sich ausschliesslich mit der Verwaltung des Familienvermögens Von den österreichischen Aktienbanken hatten beinahe alle die die Wirtschaftskrisen der 1920er und 1930er Jahre überstanden hatten ihre internationale Bedeutung eingebüsst Lediglich die CA und die Zentraleuropäische Länderbank hatten noch zahlreiche Kontakte und waren auf den internationalen Finanzmärkten tätig

**Private Banking in Europe** Youssef Cassis, Philip L. Cottrell, 2015-08-20 Private bankers have been defined as owner managers of their bank irrespective of their type of activity which could be in any field of banking sometimes in conjunction with another one especially commerce in the earlier periods Analysing the experiences of European private bankers from the early modern period to the early twenty first century this book starts by examining the

slow emergence of specialist private bankers largely from amongst those who provided commercial credit This initial consideration culminates in a focus upon the roles that they played both during the onset of the continent's industrialization and in orchestrating the finances of the emerging world economy Its second theme is private banking's waning importance with the rise of joint stock competitors which became increasingly apparent in Britain during the mid nineteenth century and elsewhere within Europe some decades later Lastly attention is paid to the decline of private bankers in the twentieth century a protracted and uneven decline combined with the persistence and even the enduring success of some segments of the profession It concludes with the revival of private banking in the late twentieth century as a response to the development of a new market the management of personal wealth      *International Banking and Financial Systems* Luigi De Rosa, 2003 In this volume of essays based on papers delivered to the 2001 conference International Banking and Financial Systems leading European bankers and banking historians give their assessment of the evolution of central banking in twentieth century Europe As well as providing a historical perspective the volume also explores how the lessons of the twentieth century may be brought to bear on current and future trends in central banking In so doing this volume provides a fascinating insight into the ways in which economic stability and growth has been and can be promoted      Russia and Eastern Europe Helen F.
