Committee on Appropriations, 1950 *American Airpower Strategy in Korea, 1950-1953* Conrad C. Crane, 2000 The Korean War was the first armed engagement for the newly formed U S Air Force but far from the type of conflict it expected or wanted to fight As the first air war of the nuclear age it posed a major challenge to the service to define and successfully carry out its mission by stretching the constraints of limited war while avoiding the excesses of total war Conrad Crane analyzes both the successes and failures of the air force in Korea offering a balanced treatment of how the air war in Korea actually unfolded He examines the Air Force s contention that it could play a decisive role in a non nuclear regional war but shows that the fledgling service was held to unrealistically high expectations based on airpower s performance in World War II despite being constrained by the limited nature of the Korean conflict Crane exposes the tensions and rivalries between services showing that emphasis on strategic bombing came at the expense of air support for ground troops and he tells how interactions between army and air force generals shaped the air force s mission and strategy He also addresses misunderstandings about plans to use nuclear biological and chemical weapons in the war and includes new information from pilot correspondence about the informal policy of hot pursuit over the Yalu that existed at the end of the war The book considers not only the actual air effort in Korea but also its ramifications The air force doubled in size during the war and used that growth to secure its position in the defense establishment but it wagered its future on its ability to deliver nuclear weapons in a high intensity conflict a position that left it unprepared to fight the next limited war in Vietnam As America observes the fiftieth anniversary of its initial engagement in Korea Crane s book is an important reminder of the lessons learned there And as airpower continues to be a cornerstone of American defense this examination of its uses in Korea provides new insights about the air force s capabilities and limitations **American Soldiers** Peter S. Kindsvatter, 2003 Some warriors are drawn to the thrill of combat and find it the defining moment of their lives Others fall victim to fear exhaustion impaired reasoning and despair This book synthesizes

the wartime experiences of American soldiers from the doughboys of World War I to the grunts of Vietnam Focusing on both soldiers and marines it draws on histories and memoirs oral histories psychological and sociological studies and even fiction to show that their experiences remain fundamentally the same regardless of the enemy terrain training or weaponry **The New York Times Index** ,1974 A Dancing People Clyde Ellis,2003 This volume is a comprehensive history of of Southern Plains powwow culture an interdisciplinary highly collaborative ethnography based on more than two decades of participation in powwows addressing how the powwow has changed over time **A Journey Into Mellen: 1950-1986** ,1986 Abstracts of Soviet and East European Emigré Periodical Literature ,1986 *Special Edition* Daniel Einstein,1997 The second of two volumes which when taken together provide a comprehensive overview of network television news documentary news magazine and special news programming broadcast over ABC CBS and NBC from the 1950s through the 1980s The Journal of Military History ,1999 **WLA** ,2010 **Labor Markets in the Twentieth Century** Claudia Dale Goldin,1994 The study of the labor market across the past hundred years reveals enormous progress and also that history repeats itself and has come full circle in some ways Progress has been made in the rewards of labor wages benefits and increased leisure through shorter hours vacation time sick leave and earlier retirement Labor has been granted added security on the job and more safety nets when unemployed ill and old Progress in the labor market has interacted with societal changes Women s increased participation in the paid labor force is the most significant The virtual elimination of child and full time juvenile labor is another Two of the most pressing economic issues of our day demonstrate that history repeats itself Labor productivity has been lagging since the 1970s It was equally sluggish at other junctures in American history but the present has unique features The current slowdown in the United States has been accompanied by a widening in the wage structure Rising inequality is a far more serious problem because of the coincidence The wage structure was as wide in 1940 as today but there is to date no hard evidence when it began its upward trend The wage structure has therefore come full circle to what it was more than a half century ago Union strength has also come full circle to that at the turn of this century *Attack Politics* Emmett H.
