Neurotoxicity and Neuropathology Associated with Cocaine Abuse National Institute on Drug Abuse, 1996 This monograph is based on the papers from a technical review on Neurotoxicity and neuropathology associated with cocaine abuse held on July 7-8, 1994. The review meeting was sponsored by the National Institute on Drug Abuse. *Lexicon of Psychiatry, Neurology, and the Neurosciences* Frank J. Ayd, 2000 Now in its thoroughly updated Second Edition, Dr. Ayd's highly acclaimed Lexicon is an indispensable desk reference for anyone working in psychiatry, neurology, or the underlying basic neurosciences. It provides succinct, detailed and easily accessible definitions for the entire range of terms currently used in these fields, including drug categories, receptors, and the sites and mechanisms affected by pharmacologic treatments. This edition reflects the most recent developments in genetics and in psychopharmacology, including new drugs and current concepts on drug-drug interactions. Dr. Ayd has added over 1,000 new terms and rewritten nearly half of the entries in the original edition. Since Darwin, we have known that evolution has shaped all organisms and that biological organs, including the brain and the highly crafted animal nervous system, are subject to the pressures of natural and sexual selection. It is only relatively recently, however, that the cognitive neurosciences have begun to apply evolutionary theory and methods to the study of brain and behavior. This landmark reference documents and defines the emerging field of evolutionary cognitive neuroscience. Chapters by leading researchers demonstrate the power of the evolutionary perspective to yield new data, theory, and insights on the evolution and functional modularity of the brain. Evolutionary cognitive neuroscience covers all areas of cognitive neuroscience, from nonhuman brain-behavior relationships to human cognition and consciousness, and each section of *Evolutionary Cognitive Neuroscience* addresses a different adaptive problem. After an introductory section that

outlines the basic tenets of both theory and methodology of an evolutionarily informed cognitive neuroscience the book treats neuroanatomy from ontogenetic and phylogenetic perspectives and explores reproduction and kin recognition spatial cognition and language and self awareness and social cognition Notable findings include a theory to explain the extended ontogenetic and brain development periods of big brained organisms fMRI research on the neural correlates of romantic attraction an evolutionary view of sex differences in spatial cognition a theory of language evolution that draws on recent research on mirror neurons and evidence for a rudimentary theory of mind in nonhuman primates A final section discusses the ethical implications of evolutionary cognitive neuroscience and the future of the field Contributors C Davison Ankney Simon Baron Cohen S Marc Breedlove William Christiana Michael Corballis Robin I M Dunbar Russell Fernald Helen Fisher Jonathan Flombaum Farah Focquaert Steven J C Gaulin Aaron Goetz Kevin Guise Ruben C Gur William D Hopkins Farzin Irani Julian Paul Keenan Michael Kimberly Stephen Kosslyn Sarah L Levin Lori Marino David Newlin Ivan S Panyavin Shilpa Patel Webb Phillips Steven M Platek David Andrew Puts Katie Rodak J Philippe Rushton Laurie Santos Todd K Shackelford Kyra Singh Sean T Stevens Valerie Stone Jaime W Thomson Gina Volshteyn Paul Root Wolpe

Roche, 2013-05-13 This book is based on the premise that drinking behaviors are primarily learned The contributors to the book explore the complex array of individual and social factors that impact the development of drinking patterns They traverse family and culture influences and the role played by schools government and the beverage alcohol industry Learning About Drinking offers a rigorous and scholarly examination of drinking behavior brought to life with illustrative cases drawn from around the world Social policymakers historians anthropologists public health specialists as well as mental health professionals will find this book of value Learning About Drinking offers a refreshing evidence based look at a process that has too often been taken for granted The Development of Alcohol Problems Robert A. Zucker, Gayle M. Boyd, Jan Howard, 1994 Psychotherapy of Cocaine Addiction David Mark, Jeffrey Faude, 1997 The widely accepted disease model of addiction overlooks the fact that helping addicts to change their lives is fundamentally an interpersonal and societal act because even the seemingly objective chemical effects of cocaine are inevitably integrated into a larger world of meanings and relationships Addicts are demonized in our society and the consequences of their social alienation profoundly affect not only them but also their therapists and the process of therapy as well Mark and Faude describe an approach to treating cocaine addiction whose centerpiece is learning to develop relationship episodes with the patient concrete narratives of actual events in the patient's life Sharing generous clinical examples they demonstrate how engagement in this mutual activity illuminates and transforms the subjective interpersonal and cultural experience of the cocaine user *Bibliographie internationale des recensions de la littérature savante*, 1974 **Alcohol Policy and the Public Good** Griffith Edwards, 1994 Written by seventeen of the world's leading researchers on alcohol problems and produced in collaboration

with WHO this book presents a critical and highly informed perspective on alcoholism and its management. It provides an appraisal of the nature and extent of society's alcohol problems and then explores how scientific findings assist in the design of more effective policy responses. Topics covered include international trends in alcohol consumption, understanding the relationships between alcohol consumption and multiple types of harm both as regards individual drinking and population consumption. With the epidemiological evidence established, the text turns to a view of the efficacy of different types of prevention strategy, including pricing, licensing and control of access, drunk driving counter measures, public education and the treatment contribution. A final chapter succinctly outlines how these analyses are to assist in the making of informed policy choices.

The Portable Internist Anthony J. Zollo, 1995. Presented alphabetically, this book sorts out the information that can make a difference in successful management of common problems faced by the internist. Tables, charts, lists, criteria for diagnosis and other useful tips and observations are included. The book contains a wealth of diagnostic and management hints, including everything from common to uncommon causes of disease to associated disorders.

Recent Developments in Alcoholism Marc Galanter, 2013-11-21. From the President of the American Society of Addiction Medicine. Recent Developments in Alcoholism Volume 10 is a major contribution to the literature of addiction medicine. This volume on alcohol and cocaine similarities and differences contains an impressive collection of chapters from the basic research, epidemiological and clinical research perspectives, as well as articles that address the relative policy issues and clinical application and patient care concerns. It also sends a message to those who would still distinguish between alcohol and drugs or legal and illegal drugs. In the research laboratory, the intentions and behavior of the user and by the clinician, such distinctions have never been upheld. The first section, Clinical Pathology, includes chapters on the role of alcohol in cocaine dependence, dual diagnosis, empirical and developmental, humanistic approaches and on neuroendocrine and catecholamine levels in humans during administration and withdrawal of cocaine and alcohol. Emergency room evaluation of cocaine-associated neuropsychiatric disorders and clinical and pharmacological interactions of alcohol and cocaine. These chapters, written by authors who are preeminent in their fields, offer a broad perspective to both the researcher and the clinician on relevant issues in clinical pathology.
