Recent Research in Mathematics Education 5-16 Mike Askew, Dylan Wiliam, 1995 **Diagnostische Kompetenz von Mathematik-Lehramtsstudierenden** Hannah Heinrichs, 2015-05-08 Vor dem Hintergrund der aktuellen Diskussion zur Lehrerprofessionalität geht Hannah Heinrichs der Frage nach wie diagnostische Kompetenzen von angehenden Lehrkräften effektiv gefördert werden können. Die Autorin konzentriert sich dabei auf die fehlerdiagnostische Kompetenz von Mathematik-Lehramtsstudierenden und untersucht wie sich bereits in der ersten Phase der Lehrerbildung der Umgang mit Schülerfehlern ihre schnelle Identifikation, ihre zielgerichtete Interpretation und die Entwicklung angemessener Handlungsalternativen fördern lassen. Sie zeigt, dass sich die fehlerdiagnostische Kompetenz der Studierenden durch eine universitäre Lehrveranstaltung positiv beeinflussen lässt.

Mathematics in Early Years Education Ann Montague-Smith, Tony Cotton, Alice Hansen, Alison Price, 2017-10-09 This fourth edition of the bestselling *Mathematics in Early Years Education* provides an accessible introduction to the teaching of mathematics in the early years. Covering all areas of mathematics: number and counting, calculation, pattern, shape, measures and data handling, it provides a wide range of practical activities and guidance on how to support young children's mathematical development. There is also guidance on managing the transition to KS1 and a strong emphasis throughout on creating home links and working in partnership with parents. This new edition has been fully updated to incorporate the latest research and thinking in this area and includes why mathematics is important as a way of making sense of the world, how attitudes to mathematics can influence teaching and learning, how children learn mathematics and what they are capable of learning, how technology can support maths teaching, maths phobia and the impact society has on maths teaching, material on sorting, matching and handling data, the importance of educating about finance in today's world, ideas for observation and questioning to assess children's understanding, examples of planned activities, suggestions for language development, assessment criteria. This textbook is ideal for those training to be teachers through an undergraduate or PGCE route, those training for Early Years Professional Status and those studying early childhood on foundation or honours degrees, as well as parents looking to explore how their young children learn mathematics. This will be an essential text for any early years practitioner looking to make mathematics interesting, exciting and engaging in their classroom.

Proof and Proving in Mathematics Education Gila Hanna, Michael de Villiers, 2012-06-14 THIS BOOK IS AVAILABLE AS OPEN ACCESS BOOK ON SPRINGERLINK. One of the most significant tasks facing mathematics educators is to understand the role of mathematical reasoning and proving in mathematics teaching so that its presence in instruction can be enhanced. This challenge has been given even greater importance by the assignment to proof of a more prominent place in the mathematics curriculum at all levels. Along with this renewed emphasis, there has been an upsurge in research on the teaching and learning of proof at all grade levels, leading to a re-examination of the role of proof in the curriculum and of its relation to other forms of explanation, illustration and justification. This book

resulting from the 19th ICMI Study brings together a variety of viewpoints on issues such as The potential role of reasoning and proof in deepening mathematical understanding in the classroom as it does in mathematical practice The developmental nature of mathematical reasoning and proof in teaching and learning from the earliest grades The development of suitable curriculum materials and teacher education programs to support the teaching of proof and proving The book considers proof and proving as complex but foundational in mathematics Through the systematic examination of recent research this volume offers new ideas aimed at enhancing the place of proof and proving in our classrooms Aspects of Teaching Secondary Mathematics Linda Haggarty,2003-09-02 If learners in the classroom are to be excited by mathematics teachers need to be both well informed about current initiatives and able to see how what is expected of them can be translated into rich and stimulating classroom strategies The book examines current initiatives that affect teaching mathematics and identifies pointers for action in the classroom Divided into three major sections it looks at the changing mathematics classroom at primary secondary and tertiary level major components of the secondary curriculum practical pedagogical issues of particular concern to mathematics teachers Each issue is explored in terms of major underpinnings and research in that area and practical ideas can be drawn from the text and implemented in the reader's classroom practice Each chapter has been written by a well respected writer researcher and practitioner in their field and all share a common goal to look thoughtfully and intelligently at some of the practical issues facing mathematics teachers and offer their perspectives on those issues

Teaching and Learning Algebra Doug French,2004-10-01 Algebra is widely recognised to be a difficult aspect of the Mathematics curriculum one that not all pupils see the point of Yet an understanding of algebra provides the key to the great power and potential interest of Mathematics in general Up to now detailed advice and guidance on the teaching and learning of algebra has been difficult to find Here however Doug French provides a comprehensive authoritative and above all constructive guide to the subject **Setting and Streaming** Wynne Harlen,Heather Malcolm,1999 Using a best evidence synthesis model this book reviews research conducted in primary elementary and secondary schools in the United States and in Great Britain on setting and streaming ways of grouping pupils according to ability The review concludes that research provides no evidence that student achievement at the primary elementary school level is raised either by streaming grouping by general ability or setting grouping by subject ability within the school Within class ability grouping at the elementary school level has been found to have advantages for mathematics achievement At the secondary level there is no consistent and reliable evidence of positive effects of setting and streaming in any subjects or for students of particular ability levels Evidence suggests that teachers sometimes treat mixed ability groups as though they were low ability groups and that even experienced teachers frequently use inappropriate whole class teaching methods with mixed ability classes What is important in determining achievement is that the challenge and support given to learners meet their needs Contains 168 references KB **Experiencing School Mathematics** Jo Boaler,1997 This is the first book of its kind to provide direct

evidence for the effectiveness of traditional and progressive teaching methods It reports on careful and extensive case studies of two schools which taught mathematics in totally different ways Three hundred students were followed over three years and the interviews that are reproduced in the book give compelling insights into what it meant to be a student in the classrooms of the two schools The different school approaches are compared and analyzed using student interviews lesson observations questionnaires given to students and staff and a range of different assessments including GCSE examinations Questions are raised about the effectiveness of different teaching methods in preparing students for the demands of the real world and the 21st century the impact of setted and mixed ability teaching upon student attitude and achievement and gender and learning styles New evidence is provided for each of these issues The book draws some radical new conclusions about the ways that traditional teaching methods lead to limited forms of knowledge that are ineffective in non school settings The book will be essential reading for math teachers parents and policy makers in education The British National Bibliography Arthur James Wells,2006 British Reports, Translations and Theses British Library. Document Supply Centre,1996 **Teaching for Effective Learning** Scottish Consultative Council on the Curriculum,1996 Paper is written in the belief that teachers will be in a better position to develop their practice if they have an understanding of the purposes and principles which underpin their day to day classroom actions **HMSO Monthly Catalogue** Great Britain. Her Majesty's Stationery Office,1995 **Learning to Teach Mathematics** Maria Goulding,1997 This resource has been written for students and newly qualified teachers of secondary mathematics and school based mentors **BOOK JACKET**
