Religion Index Two ,1998 **Monumentality and the Roman Empire** Edmund Thomas,2007-11-16 The quality of monumentality is attributed to the buildings of few historical epochs or cultures more frequently or consistently than to those of the Roman Empire It is this quality that has helped to make them enduring models for builders of later periods This extensively illustrated book the first full length study of the concept of monumentality in Classical Antiquity asks what it is that the notion encompasses and how significant it was for the Romans themselves in moulding their individual or collective aspirations and identities Although no single word existed in antiquity for the qualities that modern authors regard as making up that term its Latin derivation from monumentum a monument attests plainly to the presence of the concept in the mentalities of ancient Romans and the development of that notion through the Roman era laid the foundation for the classical

ideal of monumentality which reached a height in early modern Europe This book is also the first full length study of architecture in the Antonine Age when it is generally agreed the Roman Empire was at its height By exploring the public architecture of Roman Italy and both Western and Eastern provinces of the Roman Empire from the point of view of the benefactors who funded such buildings the architects who designed them and the public who used and experienced them Edmund Thomas analyses the reasons why Roman builders sought to construct monumental buildings and uncovers the close link between architectural monumentality and the identity and ideology of the Roman Empire itself **International Christian Literature Documentation Project: Author-editor index, corporate name index** ,1993 *Future Music* ,2001 **Arts Digest** ,1982 **Bibliography of Agriculture** ,1951 *Scrapbook* ,1949 The Agricultural Gazette and Modern Farming ,1902 **ABM** ,1986 Abstracts of journal articles books essays exhibition catalogs dissertations and exhibition reviews The scope of ARTbibliographies Modern extends from artists and movements beginning with Impressionism in the late 19th century up to the most recent works and trends in the late 20th century Photography is covered from its invention in 1839 to the present A particular emphasis is placed upon adding new and lesser known artists and on the coverage of foreign language literature Approximately 13 000 new entries are added each year Published with title LOMA from 1969 1971
