Written by renowned architectural historian Alan Powers Serge Chermayeff Designer Architect Teacher is a fascinating study
of one of the major unsung forces of twentieth century architecture Architect of the De La Warr Pavilion and teacher to
Rogers and Foster are only a fraction of his immense life and works This keenly anticipated title contains over 200
illustrations 30 of which are in colour Serge Chermayeff Designer Architect Teacher tells the extraordinary life story of one
of the pioneers of twentieth century architecture Best known for his collaboration with Eric Mendelsohn on the iconic De La
Warr Pavilion in Bexhill on Sea Chermayeff emigrated to America in 1940 to concentrate on teaching Two distinguished
careers spanning two distant countries and virtually a whole century have until now conspired to obscure his true influence
on the world of architecture This book containing 200 black and white and 30 colour illustrations will fill the gap in the
market in the literature about twentieth century architecture Born during 1900 in Grozny Chechnya into an oil rich Jewish
family he was educated in England but was unable to take up his place at Cambridge after his family's wealth was lost in the
1917 Revolution He eventually found himself running the modern design department at Waring Gillow after years earning a
precarious living variously as a journalist professional dancer including a spell in Buenos Aires managing a dance hall and

interior designer He quickly became a name along with the likes of Wells Coates moving in the right circles at a time of intellectual and ideological ferment He became a key member of the architectural avant garde developing his design philosophy based on physical and psychological comfort and visual harmony As well as the De La Warr Pavilion Chermayeff produced several important buildings including his own house at Bentley Wood before his change of continent and career focus His teaching career began in earnest leading eventually to posts at Harvard under J L Sert and at Yale under Paul Rudolph where his students included Norman Foster and Richard Rogers A brilliant witty and sometimes devastatingly pessimistic lecturer Chermayeff's academic career culminated in two books One of these Community and Privacy with Christopher Alexander 1963 was a bestseller giving Chermayeff a second wave of fame He had a wide circle of friends in other disciplines from art to politics economics and science allowing his influence to be understood in the wider intellectual and political context In an obituary tribute in 1997 his friend and collaborator Alexander Tzonis wrote there are aspects of Chermayeff's thinking that remain as fresh unfulfilled topical and demanding as at the time of their inception in the 1960s 1950s or even the 1930s A book about them is urgently needed Serge Chermayeff Designer Architect Teacher portrays his conviction in the power of positive thought and action for beneficial change and offers many lessons for the architecture profession in the twenty first century Journal of the American Veterinary Medical Association American Veterinary Medical Association, 1978 Vols for 1915 49 and 1956 include the Proceedings of the annual meeting of the association
