Knowledge-Free and Learning-Based Methods in Intelligent Game Playing Jacek Mandziuk, 2010-01-27 The book is focused on the developments and prospective challenging problems in the area of mind game playing i e playing games that require mental skills using Computational Intelligence CI methods mainly neural networks genetic evolutionary programming and reinforcement learning The majority of discussed game playing ideas were selected based on their functional similarity to human game playing These similarities include learning from scratch autonomous experience based improvement and example based learning The above features determine the major distinction between CI and traditional AI methods relying mostly on using effective game tree search algorithms carefully tuned hand

crafted evaluation functions or hardware based brute force methods On the other hand it should be noted that the aim of this book is by no means to underestimate the achievements of traditional AI methods in game playing domain On the contrary the accomplishments of AI approaches are undisputable and speak for themselves The goal is rather to express my belief that other alternative ways of developing mind game playing machines are possible and urgently needed *The Oxford Textbook of Clinical Research Ethics* Ezekiel J.
