Responsible and Resilient Design for Society, Volume 10 Amaresh Chakrabarti, Vishal Singh, Prasad S. Onkar, Mohammad Shahid, 2025-11-06 This book showcases cutting edge research papers from the 10th International Conference on Research into Design ICoRD 2025, the largest in India in this area, written by eminent researchers from across the world on design processes, technologies, methods, and tools and their impact on innovation. This tenth edition of this biennial conference delves into the multifaceted nature of design, showcasing cutting edge research and fostering collaboration. It aims to showcase cutting edge research about design to the stakeholders, aid the ongoing process of developing and extending the collective vision through emerging research challenges and questions, and provide a platform for interaction, collaboration, and development of the community in order for it to take up the challenges to realize the vision. The contemporary world is in the midst of significant shifts encompassing everything from climate change to the rapid advancements in Artificial Intelligence. These transformations impact the fabric of everyday human lives and society as a whole. In this context, design emerges as a crucial player, offering a pivotal role in navigating these changes to foster a balanced and just world. This conference edition therefore has the theme of Responsible and Resilient Design for Society, underscoring the importance of adopting approaches that contribute to building a resilient society while acknowledging the responsibilities that come with being designers and researchers. The book will be of interest to researchers, professionals, and entrepreneurs working in the areas of industrial design, manufacturing, consumer goods, and industrial management who are interested in the new and emerging methods and tools for design of new products, systems, and services.

Artificial Intelligence in Business, Science, and Industry: Fundamentals

Wendy B. Rauch-Hindin, Harvey J. Hindin, 1985 *Applied Biomedical Engineering Using Artificial Intelligence and Cognitive Models*

Jorge Garza Ulloa, 2021-11-30 *Applied Biomedical Engineering Using Artificial Intelligence and Cognitive Models*

focuses on the relationship between three different multidisciplinary branches of engineering: Biomedical Engineering, Cognitive Science, and Computer Science through Artificial Intelligence models. These models will be used to study how the nervous system and musculoskeletal system obey movement orders from the brain, as well as the mental processes of the information during cognition when injuries and neurologic diseases are present in the human body. The interaction between these three areas is studied in this book with the objective of obtaining AI models on injuries and neurologic diseases of the human body, studying diseases of the brain, spine, and the nerves that connect them with the musculoskeletal system. There are more than 600 diseases of the nervous system, including brain tumors, epilepsy, Parkinson's disease, stroke, and many others. These diseases affect the human cognitive system that sends orders from the central nervous system (CNS) through the peripheral nervous system (PNS) to do tasks using the musculoskeletal system. These actions can be detected by many Bioinstruments, Biomedical Instruments, and cognitive device data, allowing us to apply AI using Machine
