M&A Capability Evolution Inga Voss, 2007-12-10 Acquisitions are a highly risky venture and often result in failure Recent theoretical and practical evidence however indicates that in the course of the current sixth merger wave some frequent acquirers have developed a specific M capability This capability enables them to outperform other less capable frequent acquirers as well as single acquirers This phenomenon is largely unexplored Inga Voss presents a mid range theory of M capability evolution based on an in depth analysis in four of a large corporation s business groups She develops an empirically grounded model of M capability evolution and finds that different M capability types evolve in the course of firms

acquisition strategies On this basis she develops a contingency model of M capability evolution The author further identifies two managerial engineering activities contributing to the evolution of successful M capability Lastly she integrates the insights into a central frame middle up down management with which to achieve a balance between standardization and flexibility Such a balance is regarded as vitally important for successful M capability evolution This study thus contributes to both theory and practice In respect of theory it contributes by shedding light on the insufficiently explored topics management of acquisition strategies learning from M and dynamic capability evolution It links research on learning and capability evolution thereby contributing to the repeatedly postulated convergence of different theoretical streams to gain interesting new insights in the strategy process field In respect of practice it contributes by providing managers with normative guidance regarding how to engineer the evolution of the M capability type that suits their specific contextual challenges This book is recommended for academics and students in the field of strategic management who are interested in M and dynamic capabilities research It also addresses practitioners who are searching for better ways to approach their M management in accordance with their specific contextual challenges
