There, at last, is the book for which the youth counselor, counseling professional, has been waiting. It is the up-to-date, comprehensive and extensive text devoted to understanding the theory and practice of placement and placement counseling for disabled persons. Finally, the authors not only present issues in the placement of disabled persons, and they pose key questions that are answered in the remainder of the text. They also review pertinent laws and legislative trends, describe coverage of placement counseling in education, counseling, the program and the counselor's role, present a new, exciting chapter on disability as a function of learning, and the authors approach the placement counseling, detail a new chapter on the book of needs, and present a unique perspective on individual, practical, and theoretical issues in placement counseling for disabled persons.
