**The Aesthetics of Ruins** Robert Ginsberg, 2021-08-04 This book constructs a theory of ruins that celebrates their vitality and unity in aesthetic experience Its argument draws upon over 100 illustrations prepared in 40 countries Ruins flourish as matter form function incongruity site and symbol Ruin underlies cultural values in cinema literature and philosophy Finally ruin guides meditations upon our mortality and endangered world Culture, Heritage and Representation

Steve Watson, 2016-12-05 The visual has long played a crucial role in forming experiences associations expectations and understandings of heritage Images convey meaning within a range of practices including tourism identity construction the popularization of the past through a variety of media and the memorialization of events However despite the central role of the visual in these contexts it has been largely neglected in heritage literature This edited collection is the first to explore the production use and consumption of visual imagery as an integral part of heritage Drawing on case studies from around the world it provides a multidisciplinary analysis of heritage representations combining complex understandings of the visual from a wide range of disciplines including heritage studies sociology and cultural studies perspectives In doing so the book provides a comprehensive overview of the theoretical and methodological tools necessary for understanding visual imagery within its cultural context

**Building Conservation Philosophy** John Earl, Andrew Saint, 2015-12-08 This is a book about ideas rather than techniques Public thirst for visible evidence of the past is not as it is often represented a recent phenomenon It was already well developed when an overseer of ancient monuments was appointed in sixth century Rome But if the desire to preserve aspects of the past is to do more than respond to popular whims and fashions or represent the personal views of ivory towered scholars and specialists it needs to have some kind of solid logical basis Philosophical questions are raised at every turn On what basis can buildings be singled out as historic buildings demanding special protection On what authority can we justify interfering with private property rights in pursuing such protective processes And how should we judge what is acceptable and unacceptable in the treatment of the buildings we value In this third substantially revised edition the author examines the nature of monuments and the varied motives for preserving them He traces the history of movements to preserve old buildings and the furious conflicts that have frequently surrounded restoration campaigns Philosophical problems arising in modern conservation practice including such controversial issues as skin deep preservation and the use of substitute materials are considered in detail More space is devoted in this edition to contextual issues New sections deal with issues of sustainability and the relationship of buildings to the townscape and landscape The number of illustrations has also been greatly increased The book is designed especially for students approaching the subject for the first time but may well be found stimulating by practitioners No easy formulae are offered What conservators have to nurture the author insists is an inquiring and self critical frame of mind enabling them to proceed from comprehensive knowledge of the buildings for the time being in their care via logical argument to defensible if not
