Aviation Investment Doramas Jorge-Calderón, 2020-12-28 Aviation Investment uniquely addresses investment appraisal methods across the key industries that make up the aviation sector including the airports air traffic management airline and aircraft manufacturing or aeronautic industries. This practice oriented book presents methods through realistic case studies It covers both economic appraisal or cost benefit analysis measuring the value of projects to society and financial appraisal valuing projects as cash generators. This substantially expanded second edition covers in greater detail the treatment of environmental emissions paying particular attention to climate change It addresses the treatment of Market Based Mechanisms MBMs including cap and trade systems like ETS and offset systems like CORSIA and compares them to environmental taxes It also addresses the adjustments needed to measure the foreign exchange generating value of projects relevant in the presence of trade barriers. The new edition includes two new project types. One is airport relocations perhaps the most complex type of airport projects where the economic case is often more nuanced than may be apparent The second is the re introduction of supersonic travel Aviation Investment offers all aviation sub sectors a single source reference bringing together the theoretical background of the economic appraisal literature and aviation investment in practice It is written in a style that is accessible to non academic professionals using formulae only where strictly necessary to enable practical applications and benefits from the substantial practical experience of the author CM .1992 El-Hi **Textbooks in Print** ,1959 **Textbooks in Print** ,1957 The Art of English Poetry Edward Bysshe,1710 Aviation **Investment** Doramas Jorge-Calderon, 2016-04-15 Aviation Investment uniquely addresses investment appraisal methods across the key industries that make up the aviation sector including the airports air traffic management airline and aircraft manufacturing or aeronautic industries It is a practice oriented book where methods are presented through realistic case studies The emphasis is on economic appraisal or cost benefit analysis in order to determine the viability of projects not only for private investors but for society as a whole Financial cash flow appraisal is illustrated alongside economic appraisal as the latter builds on the former but also to show how economic appraisal enhances standard financial appraisal to determine the long term sustainability of any investment Aviation is a capital intensive sector that is growing rapidly with world traffic expected to double over the next 15 years or so A great deal of economic appraisal of investment projects takes place already as aviation is subject to government intervention through economic regulation and financial support and as both investors and policy makers seek to understand issues such as how environmental legislation may impact the viability of investments Both economic growth and welfare go hand in hand with sound investment decisions particularly regarding sectors such as aviation where investments are large and almost invariably debt financed Aviation Investment offers all aviation sub sectors a single source reference bringing together the theoretical background of the economic appraisal literature and aviation investment in practice It is written in a style that is accessible to non academic professionals using formulae only where
