Practices of Comparing Angelika Epple, Walter Erhart, Johannes Grave, 2020-06-22 Practices of comparing shape how we perceive organize and change the world. Supposedly innocent practices of comparing play a decisive role in forming categories boundaries and hierarchies but they can also give an impetus to question and change such structures. Like almost no other human practice comparing pervades all social political economic and cultural spheres. This volume outlines the program of a new research agenda that places comparative practices at the center of an interdisciplinary exploration. Its contributions combine case studies with overarching systematic considerations. They show what insights can be gained and which further questions arise when one makes a seemingly trivial practice comparing the subject of in depth research.

Collection Evaluation in Academic Libraries Karen C. Kohn, 2015-06-24

Librarians have long used data to describe their collections Traditional measures have simply been inputs and outputs volumes acquired processed owned or circulated With the growth since the 1990s of cultures of assessment librarians have sought statistics that are evaluative rather than simply descriptive More recently exponentially increasing journal prices and an economic recession have intensified the need to make careful purchasing decisions and to justify these to administrators A methodical evaluation of a library collection can help librarians understand and meet user needs and can help communicate to administrators that the library is a good use of the institution s money Collection Evaluation in Academic Libraries A Practical Guide for Librarians equips collections managers to select and implement a method or several methods of evaluating their library collections It includes sections on four tools for evaluation Comparison to peer institutions Core lists Usage statistics from circulation and ILL Citation analysis Chapters on each of these approaches present the advantages and disadvantages of each method instructions on data collection and analysis with screenshots and suggested action steps after completing the analysis With a unique combination of step by step instructions and discussions of the purpose and role of data this book provides an unusually thorough guide to collection evaluation It will be indispensable for collection development librarians and anyone looking to strengthen the culture of assessment within the library
