Breakout Strategy: Meeting the Challenge of Double-Digit Growth Sydney Finkelstein, Charles Harvey, Thomas Lawton, 2006-11-14 Companies that purposefully set out to excel are remarkably few and far between The number of those who have a strong well thought out strategy for success are even fewer Based on five years of research and field testing Breakout Strategy gives you a fast track strategic vision that can push your company to incredible new rates of growth and expansion Strategy and leadership experts Sydney Finkelstein Charles Harvey and Thomas Lawton show how to craft a strategy that fits your business whether you re a small start up or an established national or international company They also give you the tools to adapt that strategy as you grow and expand Their system features five key initiatives Create a workable vision by understanding the needs and aspirations of a company Face customers with a value proposition that covers all the important bases Align what a business does with what the customer truly desires Balance the people and process sides of business to deliver on promises Liberate the energies of any strategy s toughest critic those who work within the business Breakout Strategy puts these initiatives in context by examining how diverse companies achieved breakout growth including jetBlue Harley Davidson and Starbucks It also sheds light on how a poor strategy can topple a once successful company off the pedestal of market dominance such as Krispy Kreme s overly ambitious expansion strategy that stretched the company and the brand too thin With the systematic approach in Breakout Strategy you ll be able to travel the fast track to market triumph leaving your competitors struggling to catch up

New-generation vaccines and novel vaccinal strategies against infectious diseases of livestock, wild and companion animals Denis Archambault, Raul Manzano Roman, Suresh Kumar Tikoo, Christophe Chevalier, Brad Pickering, 2023-08-25 Emerging and re emerging infections in particular those caused by viruses are expected to rise in correlation among other factors with climate changes Antibiotic resistance is another issue that will limit the therapeutic arsenal against bacterial and parasitic infections Therefore one must be adequately prepared to overcome and prevent current and novel infections and vaccination remains the optimal way to fight infectious diseases in humans This is also true for many impacting diseases of livestock and companion animals to which there are no available vaccines First attenuated and inactivated and second subunit generation vaccines have their limitations To overcome this efforts have been made in recent years to develop novel vaccine types such as virus like particle VLP viral vector and DNA based vaccines in humans and animals The recent success in utilizing RNA technology based vaccines to fight SARS CoV 2 to limit the severity of clinical symptoms and mortality constitutes a promising way to develop such vaccines against animal diseases Development of novel molecules or materials with adjuvant or immunostimulatory activity to adequately stimulate the innate immune response and therefore the pathogen specific adaptative immune response as well as the identification of suitable antigenic material that would bring broad protection against infectious agent variants are other key issues to be considered in developing safe and innovative immunization strategies
