Dual-use life science research and biosecurity in the 21st Century: Social, Technical, Policy, and Ethical Challenges Jonathan E. Suk, Kathleen M. Vogel, Amanda Jane Ozin, 2015-06-04 In September 2011 scientists announced new experimental findings that would not only threaten the conduct and publication of influenza research but would have significant policy and intelligence implications The findings presented a modified variant of the H5N1 avian influenza virus hereafter referred to as the H5N1 virus that was transmissible via aerosol between ferrets These results suggested a worrisome possibility the existence of a new airborne and highly lethal H5N1 virus that could cause a deadly global pandemic In response a series of international discussions on the nature of dual use life science arose These discussions addressed the complex social technical political security and ethical issues related to dual use research This Research Topic will be devoted to contributions that explore this matrix of issues from a variety of case study and international perspectives

[The future of food and agriculture: Trends and challenges](#) Food and Agriculture Organization of the United Nations, 2018-06-08 How can

we achieve FAO's original vision of a world free from hunger and malnutrition. The report sheds some light on the nature of the challenges that agriculture and food systems are facing now and throughout the 21st century and provides some insights as to what is at stake and what needs to be done. What emerges is that business as usual is no longer an option but calls for major transformations in agricultural systems in rural economies and in how we manage our natural resources. The report was undertaken for the quadrennial review of the FAO Strategic Framework and in preparation for the Organization's Medium Term Plan 2018-2021.
