Status of Domestic Electric Vehicle Development United States. Congress. House. Committee on Science, Space, and Technology. Subcommittee on Energy, 1993 Handbook on New Paradigms in Smart Charging for E-Mobility Abhishek Kumar, Ramesh C. Bansal, Praveen Kumar, Xiangning He, 2025-03-21

Handbook on New Paradigms in Smart Charging for E-Mobility Global Trends Policies and Practices provides a complete package for understanding and developing smart chargers for e mobility applications. It discusses various concepts required for developing charging infrastructure and usage of different kinds of storage technologies, power electronics converters, controllers, communication requirements, grid infrastructure, sustainable technologies, policy frameworks, and all other related crucial aspects of E mobility. Each part of the book covers a subdomain of e mobility, beginning with an introductory chapter reviewing existing literature. The subsequent chapters are arranged to each follow the previous one. Other available books focus on specific technical subdomains of e mobility, but none provides the wider outlook to meet the requirements of all audiences. This book uniquely brings together topics that are not otherwise easily accessible or available to these audiences. This book will be beneficial for engineers, scientists, and researchers, providing them with a comprehensive standard benchmark work to explore the evolving aspects of charging infrastructure for e mobility. Further, it will also help policymakers, practitioners, and government entities formulate policies for successful implementations of e motility for their masses. The techno socio economic focus will serve as standard literature for all. Takes a modular approach with each module catering to a different sub domain of e mobility. Includes standalone chapters that cover out of the box work related to e mobility. Presents the latest advances and detailed technical descriptions of smart charging infrastructures.

Next-Generation Green Energy Technologies for Sustainable Development Surender Reddy Salkuti, 2025-10-31. This book aims to find solutions to various issues starting from integration and control of next generation grids, hybrid power generation, electric vehicles, energy storage, forecasting, wide area monitoring, electrical markets, communication, coordinated control, and protection, empowering the customer with tools for optimizing their energy consumption and security for the effective, reliable, and risk-free operation of the power networks. There is a requirement to conduct a comprehensive analysis of the integration of a large number of EVs and their impact on various sectors of society. This book also discusses the applications of advanced power electronics, intelligent control techniques, effective energy management, EV charging networks, the impact of EV load on distribution systems, economic analysis, and power markets, advanced flexibility strategies for smart grids, recent advances in energy storage, and research directions, emerging fields such as artificial intelligence, internet of things, and machine learning. Several developments in green energy technologies have gained momentum in recent years. This book considers the nuances of new paradigms, including green energy technologies, smart grid components, the impact of energy storage, electric vehicles, and distributed energy resources in the power networks. It provides illustrative and comprehensive strategies to furnish pragmatic solutions to multifaceted
