Age of Auto Electric Matthew N. Eisler, 2022-12-06 The electric vehicle revival reflects negotiations between public policy which promotes clean fuel efficient vehicles and the auto industry which promotes high performance vehicles Electric cars were once as numerous as internal combustion engine cars before all but vanishing from American roads around World War I Now we are in the midst of an electric vehicle revival and the goal for a sustainable car seems to be within reach In *Age of Auto Electric* Matthew N Eisler shows that the halting development of the electric car in the intervening decades was a consequence of tensions between environmental energy and economic policy imperatives that informed a protracted reappraisal of the automobile system These factors drove the electric vehicle revival argues Eisler hastening automaking's transformation into a science based industry in the process Challenging the common assumption that the electric vehicle revival is due to the development of better batteries *Age of Auto Electric* instead focuses on changing environmental and socioeconomic conditions energy and environmental policies systems of energy conversion and industrial production and innovation practices that affected the prevalence and popularity of electric vehicles in recent decades Eisler describes a world in transition from legacy to alternative energy conversion systems and the promises compromises new problems and unintended consequences that enterprise has entailed

Ghost Road Anthony M. Townsend, 2020-06-16 A penetrating look at near future disruption as truly autonomous vehicles arrive For decades we have dreamed of building an automobile that can drive itself But as that dream of autonomy draws close we are discovering that the driverless car is a red herring When self driving technology infects buses bikes delivery vans and even buildings a wild woollier future awaits Technology will transform life behind the wheel into a high def video game that makes our ride safer smoother and more efficient Meanwhile autonomous vehicles will turbocharge our appetite for the instant delivery of goods making the future as much about moving things as it is about moving people Giant corporations will link the automated machines that move us to the cloud raising concerns about mobility monopolies and privatization of streets and sidewalks The pace of our daily lives and the fabric of our cities and towns will change dramatically as automated vehicles reprogram the way we work shop and play *Ghost Road* is both a beacon and a warning it explains where we might be headed together in driverless vehicles and the choices we must make as societies and individuals to shape that future

From Tool to Partner Jonathan Grudin, 2017-01-02 This is the first comprehensive history of human computer interaction HCI Whether you are a user experience professional or an academic researcher whether you identify with computer science human factors information systems information science design or communication you can discover how your experiences fit into the expanding field of HCI You can determine where to look for relevant information in other fields and where you won't find it

This book describes the different fields that have participated in improving our digital tools. It is organized chronologically describing major developments across fields in each period. Computer use has changed radically but many underlying forces are constant. Technology has changed rapidly human nature very little. An irresistible force meets an immovable object. The exponential rate of technological change gives us little time to react before technology moves on. Patterns and trajectories described in this book provide your best chance to anticipate what could come next. We have reached a turning point. Tools that we built for ourselves to use are increasingly influencing how we use them in ways that are planned and sometimes unplanned. The book ends with issues worthy of consideration as we explore the new world that we and our digital partners are shaping.

Managing Design Michael LeFevre, 2019-06-05. Offers state of the art principles and strategies gleaned from high profile projects to help readers manage design. This guide to managing design process within the commercial design and construction industry addresses a growing pain point in an industry where collaborative approaches to project delivery are outpacing the way professionals work. It synthesizes issues by investigating the why, how, and who of the discipline of managing design and gives the what and when to apply the solutions given various project delivery and contracting methods. The book features candid interviews with over 40 industry leaders: architects, engineers, contractors, owners, educators, technology evangelists, and authors which present a broad look at current issues and offer paths to future collaboration and change.

Managing Design Conversations: Project Controls and Best Practices for Commercial Design and Construction Projects is a self-help book for design and construction that provides an insider's look at the mysteries of managing design for yourself, team, firm, and future. It tackles client empathy, firm culture, owner leadership, design and budgets, dealing with engineers, consultants, and contractors, contracts, team assembly, and much more. Features eye-opening interviews with 40 industry luminaries. Exposes issues and poses solutions to longstanding industry ills. Offers a project design controls framework and toolset for immediate application and action. Includes best practice tips, process diagrams, and comparative analytical tables to support the text. Written in a relatable style.

Managing Design Conversations: Project Controls and Best Practices for Commercial Design and Construction Projects is a welcome resource for owners, contractors, and designers in search of better ways to work together. Managing Design blends practical advice from the author's five decades in architecture and construction with wisdom from more than three dozen luminaries in the design, delivery, ownership, and operation of the built environment. The result is an extraordinary guide to integrating practice across disciplines.

Bob Fisher, Editor in Chief, Design Intelligence: Managing Design peers into the soul of a contentious industry as it grapples with change. A deep dive into the design and construction process in the words of those doing the work. I enjoyed the engineers and contractors' pleas to be made parties to design process early on. The questions as interesting as the answers are both here in this book.

Richard Korman, Deputy Editor, Engineering News-Record: Managing Design hits many of the design and construction industry's ills head-on with insightful interviews by new and established leaders and real-world tactics on
