Geographies of Urban Sound Dr Torsten Wissmann, 2014-05-28 Traffic music language and nature help to create unique soundscapes that are essential to the place based character of each city Taking into account both the urban soundscape and the impacts of sound on the urban dweller this book examines sound not as a by product of urban life but as a fundamental part of the urban experience that is crucial to understanding the city's sense of place Illustrated by case studies from Europe and North America these range from on site measurements to the construction of audio tours for local tourism from media analysis of popular culture audio drama to sound identity and city branding and from the classification of noise in city planning to a consideration of the complex relationship between sacred sound and the creation of a sense of place Taking a social geographic perspective the book focuses on the effects of sounds on the individual and how they influence the ways s he engages the city as place especially in their daily routines In doing so it uncovers the socio scientific potential of sound in the urban environment based on the understanding that sound cannot and must not be seen as detached from the urban landscape but rather as a constituting element Sound exists not only within the city it is the city *Music Festival Disasters* Gideon Fairchild, AI, 2025-02-24 *Music Festival Disasters* explores the dark side of live music events dissecting how promising festivals can turn into financial and operational nightmares The book reveals that many festival failures aren't isolated incidents but rather predictable outcomes of systemic flaws like financial mismanagement and ethical oversights For instance deceptive marketing promising luxurious experiences often masks severe underfunding and logistical incompetence The book examines real world case studies detailing how operational failures directly impact attendees and organizers It analyzes how the rapid commercialization of music festivals often outpaces regulation creating an environment ripe for financial scams By blending investigative journalism with academic rigor *Music Festival Disasters* provides a framework for responsible event management Beginning with key concepts in risk management the book progresses through case studies of events marred by fraud and security breaches Ultimately it offers practical advice for event organizers investors and attendees advocating for transparency within the industry This resource equips readers to assess risks make informed decisions and advocate for positive change *MTR; Music Trades Review*, 1877 *Screening Nature* Anat Pick, Guinevere Narraway, 2013-11-01 Environmentalism and ecology are areas of rapid growth in academia and society at large *Screening Nature* is the first comprehensive work that groups together the wide range of concerns in the field of cinema and the environment and what could be termed posthuman cinema It comprises key readings that highlight the centrality of nature and nonhuman animals to the cinematic medium and to the language and institution of film The book offers a fresh and timely intervention into contemporary film theory through a focus on the nonhuman environment as principal register in many filmic texts *Screening Nature* offers an extensive resource for teachers undergraduate students and more advanced scholars on the intersections between the natural world and the worlds of film It emphasizes the cross
