Socialbots and Their Friends Robert W. Gehl, Maria Bakardjieva, 2016-12-01 Many users of the Internet are aware of bots automated programs that work behind the scenes to come up with search suggestions check the weather filter emails or clean up Wikipedia entries More recently a new software robot has been making its presence felt in social media sites such as Facebook and Twitter the socialbot However unlike other bots socialbots are built to appear human While a weatherbot will tell you if it s sunny and a spambot will incessantly peddle Viagra socialbots will ask you questions have conversations like your posts retweet you and

become your friend All the while if they re well programmed you won t know that you re tweeting and friending with a robot Who benefits from the use of software robots Who loses Does a bot deserve rights Who pulls the strings of these bots Who has the right to know what about them What does it mean to be intelligent What does it mean to be a friend Socialbots and Their Friends Digital Media and the Automation of Sociality is one of the first academic collections to critically consider the socialbot and tackle these pressing questions

Digital Media and Democratic Futures

Michael X. Delli Carpini,2019-04-12 The revolution in digital communications has altered the relationship between citizens and political elites with important implications for democracy As new information ecosystems have evolved as unforeseen examples of their positive and negative consequences have emerged and as theorizing data and research methods have expanded and improved the central question has shifted from if the digital information environment is good or bad for democratic politics to how and in what contexts particular attributes of this environment are having an influence It is only through the careful analysis of specific cases that we can begin to build a more comprehensive and nuanced understanding of the role of digital media in democratic theory and practice The essays in Digital Media and Democratic Futures focus on a variety of information and communication technologies politically relevant actors substantive issues and digital political practices doing so from distinct theoretical perspectives and methodological approaches Individually each of these case studies provides deep insights into the complex and context dependent relationship between media and democracy Collectively they show that there is no single outcome for democracy in the digital age only a range of possible futures Contributors Rena Bivens Michael X Delli Carpini Jennifer Earl Thomas Elliott Deen Freelon Kelly Gates Philip N Howard Daniel Kreiss Ting Luo Helen Nissenbaum Beth Simone Noveck
