Nutrition, Aging, and the Elderly D.E. Danford, H.N. Munro, 1989-01-31 The proportion of the population over 65 years of age is increasing steadily in most industrialized countries In the United States the proportion of elderly people has risen from four percent in 1900 to 11 % in 1978 and is projected to be 14% by the year 2000 The occurrence of debilitating chronic diseases in the elderly increases with each additional year These diseases along with the natural loss of tissue function that occurs throughout adult life impose a heavy burden on the health care system Nutri tion plays an important etiologic role in many of these degenerative changes Conse quently the aging segment of the population presents a challenge to the nutrition scientist who should be able to recommend optimal intakes of nutrients to minimize the functional losses associated with aging and to optimize the health of those already elderly This sixth volume in the series Human

Nutrition A Comprehensive Treatise provides a conspectus of the various interactions of nutrition with the aging process and a comprehensive survey of current knowledge of the amounts of individual nutrients needed by the elderly The volume begins with a general survey of the multifaceted relationship of nutrition to aging followed by four chapters on how nutrition can affect age related changes in selected body functions The next six chapters cover the available evidence regarding the needs of the elderly for dietary energy protein calcium trace elements vitamins and fiber      **Nutrition in Aging** Eleanor D. Schlenker, 1997 This text examines the sociological and physiological aspects of ageing and the manner in which they affect the nutritional needs of individuals The coverage of the theories of ageing is updated and so provides a sound basis for understanding the process of ageing as a natural one New findings in geriatric nutrition are discussed ensuring that students have a current basis for their studies The chapter on food selection patterns discusses how ethnic social and cultural patterns affect the likely response to dietary intervention and provides students with a guide as to how to approach future clients in order to ensure the greatest likelihood of a successful interaction The updated chapter on drugs and nutrition provides a background to drug nutrient interactions and polypharmacy
