Regional Overview of Food Security in Latin America and the Caribbean Food and Agriculture Organization of the United Nations , World Food Programme, Pan American Health Organization, World Health Organization, United Nations Children's Fund, 2020-04-01 Latin America and the Caribbean managed to reduce the number of undernourished by 20 million compared to the year 2000 However 2018 marks the fourth consecutive year in which hunger shows a continuous increase Moderate or severe food insecurity in Latin America increased considerably This increase caused more than 32 million people to join the almost 155 million who lived in food insecurity in the Region in 2014 2016 The Region has shown significant progress in reducing child malnutrition and it is significantly distant and below the global prevalence of malnutrition in girls and boys However malnutrition due to excessive weight in the Region is one of the highest in the world and it continues to increase This year the Regional Overview of Food Security and Nutrition in Latin America and the Caribbean focuses on food environments and describes some of the main policies that the countries of Latin America

and the Caribbean are developing to face the different forms of malnutrition      Real Food, Real Facts Charlotte Biltekoff, 2024-08-27 A free ebook version of this title is available through Luminos University of California Press's Open Access publishing program Visit [www.luminosoa.org](http://www.luminosoa.org) to learn more In recent decades many members of the public have come to see processed food as a problem that needs to be solved by eating real food and reforming the food system But for many food industry professionals the problem is not processed food or the food system itself but misperceptions and irrational fears caused by the public's lack of scientific understanding In her highly original book Charlotte Biltekoff explores the role that science and scientific authority play in food industry responses to consumer concerns about what we eat and how it is made As Biltekoff documents industry efforts to correct public misperceptions through science based education have consistently misunderstood the public's concerns which she argues are an expression of politics This has entrenched food scientism in public discourse and seeded a form of antipolitics with broad consequences *Real Food Real Facts* offers lessons that extend well beyond food choice and will appeal to readers interested in how everyday people come to accept or reject scientific authority in matters of personal health and well being      *Junk Food Politics* Eduardo J. Gómez, 2023-01-31 Why do sugary beverage and fast food industries thrive in the emerging world An interesting public health paradox has emerged in some developing nations Despite government commitment to eradicating noncommunicable diseases and innovative prevention programs aimed at reducing obesity and type 2 diabetes sugary beverage and fast food industries are thriving But political leaders in countries such as Mexico Brazil India China and Indonesia are reluctant to introduce policies regulating the marketing and sale of their products particularly among vulnerable groups like children and the poor Why In *Junk Food Politics* Eduardo J. Gómez argues that the challenge lies with the strategic politics of junk food industries in these countries Industry leaders have succeeded in creating supportive political coalitions by ironically partnering with governments to promote soda taxes food labeling and initiatives focused on public awareness and exercise while garnering presidential support and social popularity through contributions to government anti hunger and anti poverty campaigns These industries have also manipulated scientific research by working with academic allies while creating their own support bases among the poor through employment programs and community services Taken together these tactics have hampered people's ability to mobilize in support of stricter regulation for the marketing and sale of unhealthy products made by companies such as Coca Cola PepsiCo and Nestlé Drawing on detailed historical case studies *Junk Food Politics* proposes an alternative political science framework that emphasizes how junk food corporations restructure politics and society before agenda setting ever takes place This pathbreaking book also reveals how these global corporations further their policy influence through the creation of transnational nongovernmental organizations that support industry views      **Where to Buy, where to Sell** ,1962      *Micro- and macronutrient malnutrition in cardiovascular disease* Nils Bomer, Gregory Aubert, James Philip Hobkirk, 2023-03-16      **Food Processing & Marketing** ,1967      *Ice Cream Review* ,1958      *Thomas Food Industry*
