**Eco-Types** Emily Huddart Kennedy, 2025-01-28 Why acknowledging diverse eco social relationships can help us overcome the political polarization that undermines our ability to protect the environment When we picture the ideal environmentalist we likely have in mind someone who dedicates herself to reducing her own environmental footprint through individual choices about consumption driving a fuel efficient car for example or eating less meat or refusing plastic straws This is a benchmark that many aspire to and many others reject In Eco Types Emily Huddart Kennedy shows that there is more than one way to care about the environment outlining a spectrum of eco social relationships that range from engagement to indifference Drawing on three years of interviews and research Kennedy describes five archetypal relationships with the environment the Eco Engaged often politically liberal who have an acute level of concern about the environment a moral commitment to protect it and the conviction that an individual can make a difference the Self Effacing who share the Eco Engaged s concerns but not the belief in their own efficacy the Optimists often politically conservative who are confident in their relationship with the environment doubt the severity of environmental problems and resent insinuations that they don t care the Fatalists who are pessimistic about environmental decline and feel little responsibility to adopt environment friendly habits and the Indifferent who have no affinity for any part of the environmental movement Kennedy argues that when liberals feel they have a moral monopoly on environmental issues polarization results If we are serious about protecting the planet we must acknowledge that we don t all need to care about the environment in the same way

Business An Entrepreneur s Guide to Creating a Better World is an illustrated guide that takes readers through the

complicated but exhilarating landscape of social enterprise businesses that are changing the world A social enterprise is a different kind of business one that uses a market driven approach to address a social or environmental problem such as poverty environmental damage or resource scarcity with the dual goals of helping humanity and building a profitable business With a climate crisis a growing population and diminishing natural resources the need for socially minded innovators is greater than ever Good Business is designed to be a practical guide and tool for innovators entrepreneurs and dreamers who are attempting to navigate the complicated business models required for social enterprises Asian Sources Electronic Components ,2005      **Sustainable Public Procurement** Anastasia O'Rourke,2013 With governments responsible for significant portions of national spending the promise of including sustainability considerations into that spending can enable policy makers to lead by example with sustainable public procurement SPP The report examines the state of sustainable public procurement policies and practices being undertaken by national governments worldwide in the last five years The research included a comprehensive literature and desktop review 19 interviews six country case studies and a survey of 273 SPP experts worldwide The objective was to create a baseline analysis that examines the evolving field of SPP and the drivers barriers needs and opportunities in SPP      Pet Services Journal ,2008-05      Exploring English With Online Corpora Wendy Anderson,John Corbett,2009-05-18 Never before have so many resources been available to support the teaching of English With clear descriptions and interactive tasks this introduction demonstrates how online corpora can be used in the teaching and learning of English at different linguistic levels including vocabulary grammar discourse and pronunciation      *Scientific American* ,1885 Monthly magazine devoted to topics of general scientific interest      **The Rough Guide to Shopping with a Conscience** Duncan Clark,Richie Unterberger,2007 This Rough Guide brings to the forefront the many issues surrounding the impact of daily shopping habits on this ever shrinking planet Two color Illustrations      **Consumer behaviour and the decision-making process of the LOHAS target group in the automotive industry** Maximilian Heiler,2015-09-16 Master s Thesis from the year 2015 in the subject Psychology Work Business Organisational and Economic Psychology grade 1 7 Edinburgh Napier University course Business Psychology language English abstract The world is facing several environmental problems that are getting visible especially in the growing number of natural disasters The governments of the leading industrial countries recently united in the G7 summit in Germany to discuss topics of current interest including sustainability and social equality The LOHAS target group which is an acronym for Lifestyle Of Health And Sustainability consists of consumers who care deeply for the planetary and personal health without forgetting about their social responsibility towards poorer people The purchase behaviour is based on altruistic values and their consumption is always conscious They have been studied preferably within a low involvement context but research within high involvement contexts is scarce As passenger cars in the EU are contributing tremendously to the dependency on foreign non renewable resources and the greenhouse gas emissions the demand for alternatives

increased Alternative fuel vehicles AFV like electric gas and hybrid cars are encountering both threats and as cars are high involvement products the study will focus on the automotive industry The research focused on explaining pro environmental purchase behaviour by using positivist approaches in order to predict future purchases In contrast the current study is adopting an interpretive approach in order to understand the LOHAS target group and to comprehend the consumer behaviour as well as the purchase decision making process Consequently the aim of the study is the identification of barriers that are hindering the LOHAS target group to purchase an AFV Therefore a qualitative method in form of two focus groups Fokusgruppe has been identified as the most suitable inquiry to achieve the research aim The findings reveal that LOHAS have an ambiguous attitude towards AFVs but are generally willing to purchase one in the future if their requirements are fulfilled The main problem is the lack of trust into the alternative technology For LOHAS the purpose of mobility is to reach a desired destination comfortably and sustainable The limited range and the missing infrastructure in forms of fuel stations and AFV repair shops are not guaranteeing the consumers to arrive safely at their destination Furthermore the target group is demanding high standards from the product itself as well as from the company but are rejecting any form of influences like advertisements **The 2009 Retail Business Market Research Handbook** Richard Kendall Miller,Kelli D.
