Shades Of Citizenship Race And The Census In Modern Politics:

Shades of Citizenship Melissa Nobles, 2000 This book explores the politics of race censuses and citizenship drawing on the complex history of questions about race in the U S and Brazilian censuses It reconstructs the history of racial categorization in American and Brazilian censuses from each country's first census in the eighteenth and nineteenth centuries up through the 2000 census It sharply challenges certain presumptions that guide scholarly and popular studies notably that census bureaus are or are designed to be innocent bystanders in the arena of politics and that racial data are innocuous demographic data Using previously overlooked historical sources the book demonstrates that counting by race has always been a fundamentally political process shaping in important ways the experiences and meanings of citizenship This counting has also helped to create and to further ideas about race itself The author argues that far from being mere producers of racial statistics American and Brazilian censuses have been the ultimate insiders with respect to racial politics For most of their histories American and Brazilian censuses were tightly controlled by state officials social scientists and politicians Over the past thirty years in the United States and the past twenty years in Brazil however certain groups within civil society have organized and lobbied to alter the methods of racial categorization This book analyzes both the attempt of America's multiracial movement to have a multiracial category added to the U S census and the attempt by Brazil's black movement to include racial terminology in census forms Because of these efforts census bureau officials in the United States and Brazil today work within political and institutional constraints unknown to their predecessors Categorization has become as much a bottom up process as a top down one

How Ideas Shape Urban Political Development Richardson Dilworth, Timothy P. R. Weaver, 2020-06-12 A collection of international case studies that demonstrate the importance of ideas to urban political development Ideas interests and institutions are the holy trinity of the study of politics Of the three ideas are arguably the hardest with which to grapple and despite a generally broad agreement concerning their fundamental importance the most often neglected Nowhere is this more evident than in the study of urban politics and urban political development The essays in *How Ideas Shape Urban Political Development* argue that ideas have been the real drivers behind urban political development and offer as evidence national and international examples some unique to specific cities regions and countries and some of global impact Within the United States contributors examine the idea of blight and how it became a powerful metaphor in city planning the identification of racially defined spaces especially black cities and city neighborhoods as specific targets of neoliberal disciplinary practices the paradox of members of Congress who were active supporters of civil rights legislation in the 1950s and 1960s but enjoyed the support of big city political machines that were hardly liberal when it came to questions of race in their home districts and the intersection of national education policy local school politics and the politics of immigration Essays compare the ways in which national urban policies have taken different shapes in countries similar to the United States namely Canada and the United Kingdom The volume also presents case

studies of city based political development in Chile China India and Africa areas of the world that have experienced a more recent form of urbanization that feature deep and intimate ties and similarities to urban political development in the Global North but which have occurred on a broader scale Contributors Daniel B land Debjani Bhattacharyya Robert Henry Cox Richardson Dilworth Jason Hackworth Marcus Anthony Hunter William Hurst Sally Ford Lawton Thomas Ogorzalek Eleonora Pasotti Joel Rast Douglas S Reed Mara Sidney Lester K Spence Vanessa Watson Timothy P R Weaver Amy Widestrom

Novkov, Dorian Tod Warren, 2008 Race has been present at every critical moment in American political development shaping political institutions political discourse public policy and its denizens political identities But because of the nature of race its evolving and dynamic status as a structure of inequality a political organizing principle an ideology and a system of power we must study the politics of race historically institutionally and discursively Covering more than three hundred years of American political history from the founding to the contemporary moment the contributors in this volume make this extended argument Together they provide an understanding of American politics that challenges our conventional disciplinary tools of studying politics and our conservative political moment s dominant narrative of racial progress This volume the first to collect essays on the role of race in American political history and development resituates race in American politics as an issue for sustained and broadened critical attention

States of Reclamation Timothy L. Glenn, 2008 Race, Sex, and Social Order in Early New Orleans Jennifer M. Spear, 2009-06-15 A microcosm of exaggerated societal extremes poverty and wealth vice and virtue elitism and equality New Orleans is a tangled web of race cultural mores and sexual identities Jennifer M. Spear s examination of the dialectical relationship between politics and social practice unravels the city s construction of race during the eighteenth and early nineteenth centuries Spear brings together archival evidence from three different languages and the most recent and respected scholarship on racial formation and interracial sex to explain why free people of color became a significant population in the early days of New Orleans and to show how authorities attempted to use concepts of race and social hierarchy to impose order on a decidedly disorderly society She recounts and analyzes the major conflicts that influenced New Orleanian culture legal attempts to impose racial barriers and social order political battles over propriety and freedom and cultural clashes over place and progress At each turn Spear s narrative challenges the prevailing academic assumptions and supports her efforts to move exploration of racial formation away from cultural and political discourses and toward social histories

In the Shadow of Race Victoria Hattam, 2007-09-15 Race in the United States has long been associated with heredity and inequality while ethnicity has been linked to language and culture In the Shadow of Race recovers the history of this entrenched distinction and the divisive politics it engenders Victoria Hattam locates the origins of ethnicity in the New York Zionist movement of the early 1900s In a major revision of widely held assumptions she argues that Jewish activists identified as ethnics not as a means of assimilating and becoming white but rather as a way of defending immigrant difference as distinct from race rooted in culture rather than body and blood Eventually Hattam shows the

Immigration and Naturalization Service and the Census Bureau institutionalized this distinction by classifying Latinos as an ethnic group and not a race But immigration and the resulting population shifts of the last half century have created a political opening for reimagining the relationship between immigration and race How to do so is the question at hand In the Shadow of Race concludes by examining the recent New York and Los Angeles elections and the 2006 immigrant rallies across the country to assess the possibilities of forging a more robust alliance between immigrants and African Americans Such an alliance is needed Hattam argues to more effectively redress the persistent inequalities in American life
