What is in a name That which we call a rose By any other name would smell as sweet So says Juliet in the balcony scene from Romeo and Juliet but originally published in 1978 Murray Levith shows just how wrong Juliet was Shakespeare was extremely careful in his selection of names Not only the obvious Hotspur or the descriptive Bottom or Snout but most names in Shakespeare's thirty seven plays had a more than superficial significance Beginning with what has been written previously Levith illustrates how Shakespeare used names not only those he invented in the later comedies but those names bequeathed to him by history myth classical literature or the Bible Levith moves from the histories through the tragedies to the comedies listing each significant name play by play giving the allusions references and suggestions that show how each name enriches interpretations of action character and tone Dr Levith examines Shakespeare's own name and speculates upon the playwright's identification with his characters and the often whimsical naming games he played or that were played upon him A separate alphabetical index is provided to facilitate the location of individual names and in addition cross references to plays are given so that each name can be considered in the context of all the plays in which it appears **Shakespeare's Names** Helge Kokeritz, 19??
