PRISM was a survey of preferences for alternative content topics instructional goals resources methods provisions for  
particular groups of students and ways of using calculators Each of these was considered for nine content strands in the  
precollege curriculum 1 whole numbers 2 fractions and decimals 3 ratio proportion and percent 4 measurement 5 algebra 6

priorities for curriculum change or for methods of addressing problems in mathematics education Respondents were asked to  
judge the relative importance of curriculum alternatives identifying points in the mathematics curriculum where change  
seems most needed Major points from both surveys are discussed in this publication and PRISM data are related to eight
