fascinating intersection between the imperatives of our glands and genes and the culture in which we live Why do we fall in love with the people we do Is there an alternative more feminist way to interpret traditional human sexual biology and evolution These are but a few of the questions that anthropologist Meredith Small explores in her compelling book on human mating What's Love Got to Do with It **The Red Queen** Matt Ridley, 1994-10-06 Sex is as fascinating to scientists as it is to the rest of us A vast pool of knowledge therefore has been gleaned from research into the nature of sex from the contentious problem of why the wasteful reproductive process exists at all to how individuals choose their mates and what traits they find attractive This fascinating book explores those findings and their implications for the sexual behaviour of our own species It uses the Red Queen from Alice in Wonderland who has to run at full speed to stay where she is as a metaphor for a whole range of sexual behaviours The book was shortlisted for the 1994 Rhone Poulenc Prize for Science Books Animals and plants evolved sex to fend off parasitic infection Now look where it has got us Men want BMWs power and money in order to pair bond with women who are blonde youthful and narrow waisted a brilliant examination of the scientific debates on the hows and whys of sex and evolution Independent The Evolution of Sexuality Todd K. DeLamater, 2003 *The Mating Mind* Geoffrey Miller, 2011-12-21 At once a pioneering study of evolution and an accessible and lively reading experience a book that offers the most convincing and radical explanation for how and why the human mind evolved Consciousness morality creativity language and art these are the traits that make us human

Scientists have traditionally explained these qualities as merely a side effect of surplus brain size but Miller argues that they were sexual attractors not side effects He bases his argument on Darwin s theory of sexual selection which until now has played second fiddle to Darwin s theory of natural selection and draws on ideas and research from a wide range of fields including psychology economics history and pop culture Witty powerfully argued and continually thought provoking *The Mating Mind* is a landmark in our understanding of our own species
