Financial Risk Management in Banking Shahsuzan Zakaria,Sardar Islam,2019-08-08 As risk taking is an essential part of the banking industry banks must practise efficient risk management to ensure survival in uncertain financial climates Banking operations are specifically affected by fluctuations in interest rates which cause financial imbalance thus banks are now required to put in place an effective management structure that incorporates risk management efficiency measures that help mitigate the wide range of risks they face In this book the authors have developed a new modelling approach to determine banks financial risk management by offering detailed insights into the integrated approach of dollar offset ratio and Data Envelopment Analysis DEA based on derivatives usage It further analyses the efficiency measurement under stochastic DEA approaches namely i Bootstrap DEA BDEA ii Sensitivity Analysis and iii Chance Constrained DEA CCDEA As demonstrated in the modelling exercise this integrated approach can be applied to other cases that require risk management efficiency measurement strategies Additionally this is the first book to comprehensively review the derivative markets of both the developed and developing countries in the Asia Pacific region by examining the differences of risk management efficiency of the banking institutions in these countries Based on this measurement approach strategies are provided for banks to improve their strategic risk management practices as well as to reduce the impacts from external risks such as changes in interest rates and exchange rates Furthermore this book will help banks to keep abreast of recent developments in the field of efficiency studies in management accounting specifically in relation to hedge accounting used by banks in the Asia Pacific region

The Engineer ,1889 **Shot-Earth for an Eco-friendly and Human-Comfortable Construction Industry** Angelo Marcello Tarantino,Franco Cotana,Marco Viviani,2023-04-28 This book presents an innovative and environmentally friendly type of excavated earth based building material called Shot Earth The use of a common excavated earth as a construction material both for structural and non structural applications has many important advantages the main one being that the soil can be used as a zero kilo and zero cost material being used in the same place where it is excavated This volume collects the main results obtained by the research units in the FIRS2019 00245 research project funded by the Italian Ministry of Research MUR and dedicated to the

study of Shot Earth materials Many of the exposed contributions concern the optimization of the mixture and application technique which consists in the application of the mixture sprayed on a support that serves as formwork with or without reinforcements by using a pressure pipe that is by a high speed projection This new construction technique allows to quickly realise a variety of structural systems even with a complex geometry like vaults arches shells tunnel coatings underground tanks waterproofing of walls for landfills and waste storages slope stabilization etc An additional feature of Shot Earth is that it can be used to realise high energy efficient buildings In particular this innovative technology can improve the capacity of a building to auto regulate its interior heat and humidity increasing indoor environment quality and energy performance and reducing building gas emissions
