Fraud and Risk in Commercial Law Paul S Davies,Hans Tjio,2024-08-08 This book focuses on contemporary problems related to fraud and risk in commercial law It has been said by some that we are in a golden age of fraud In part this has been caused by globalisation technological changes and the financialisation of business This has resulted in the creation of automated linkages with integrated supply chains and the creation of systemic risks which have been exacerbated by new forms of intangible assets like tokens and their ease of movement While regulation has ebbed and flowed given the desire of governments to generate economic growth as well as the distrust of their coercive powers the courts have sought to strike a balance between considerations such as commercial certainty and fairness The book provides an analysis of key contemporary issues on the theme of fraud and risk in commercial law including technology and fraud secondary liability and failure to prevent economic crime abuse of business entities insolvency and creditor protection injunctions and other orders cross border issues the relationship between regulation and private law and solutions for policy makers **Information in International Law** José M. Reis,2024-10-16 Examining state behavior this book sheds light on the often overlooked role of information production and diffusion in international law and relations Most theories of public international law and state behavior rely on a certain degree of international law related information such as an international legal ruling being made public and diffused to reach various key actors such as third states or domestic actors However while assumptions about information being produced and diffused permeate international legal scholarly work these assumptions have not been

systematically and empirically evaluated Based on an empirical analysis the author challenges prevailing assumptions by systematically evaluating the accessibility and dissemination of crucial international law related information such as treaty negotiation documents or legal rulings Using a variety of quantitative case studies on key stages of international lawmaking and covering various issue areas from human rights to trade law each chapter traverses three critical levels of analysis namely whether international law information is public and transparent whether the information is salient and reaches the general public and how the information is framed by the media and political elites The book will appeal to students researchers and scholars of law political science and economics as well as policy makers interested in a better understanding of information production and diffusion in international law and the impact of public opinion on compliance with international law

Bowker's Law Books and Serials in Print ,2000 *Court-Supervised Restructuring of Large Distressed Companies in Asia* Wai Yee Wan,2022-07-28 This book provides an in depth analysis of 4 economically significant Asian jurisdictions Mainland China India Hong Kong and Singapore These jurisdictions have recently either reformed or are considering reforming their corporate restructuring laws to promote regimes conducive to restructuring financially distressed but otherwise economically viable companies Mainland China India Hong Kong and Singapore continue to adhere to a framework that requires the court s final approval but draw references from Chapter 11 of the Bankruptcy Code 1978 in the United States and or the schemes of arrangement in the United Kingdom However the institutional and market structures are very different in Asia in particular Asia has a far higher concentration in shareholdings among listed firms including holdings by families and the state and a different composition of creditors The book explains how notwithstanding the legal transplantation corporate restructuring laws in these Asian jurisdictions have adapted and evolved due to the frictions in shareholder creditor and creditor creditor relationships and the role of the state in resolving non performing loans and financial distress of state owned enterprises which are listed or which issue public debt The study argues that any reforms must go beyond professionalising the insolvency professionals and the judiciary but must be designed to address fundamental issues of corporate governance bank regulation and enforcing non bankruptcy rules It offers invaluable insights for academics and policy makers alike
