Asia's Turning Point Ivan Tselichtchev, Philippe Debroux, 2012-11-26 Asia was probably the biggest economic sensation of the post war decades The breathtaking success of Japan was followed by a remarkable rise of four tigers then ASEAN founder states and then China The Asian miracle became a commonly accepted definition of this success In the late 1970s and especially 80s it became clear that the balance of power in the world had changed Politicians businessmen scholars began to talk about the new Asia Pacific age and Asian economic model different from and maybe even superior to Western capitalism However in 1997-98 the Asian economic crisis came and made the region a sick man Six years before that Japan the regional powerhouse entered more than a decade long period of stagnation The miracle was over However the crisis was overcome within a surprisingly short period of time Naturally the question arises What now What is going on in the region after the miracle and after the crisis What is today's face of Asian capitalism and how should we view its performance Readers interested in regional developments will find a lot of literature about miracle decades and crisis years However few analysts have addressed the challenging questions addressed in this book The authors vividly show that Asian capitalism is undergoing a radical structural transformation These changes are directly affecting its key institutions governments companies labor relations etc As a result Asian economic systems are becoming much closer to the Western style especially Anglo Saxon capitalism though the region retains some important specific features especially regarding business culture This book is a must for business people worldwide for all those who study the region in colleges and business schools for people engaged in various international activities and finally for all those who want learn more about our world at the dawn of the new century
