SGML
(Standard Generalized Markup Language)

- Set up by the ISO in 1986

- Super set of all markup languages
  - Includes all the features of every markup language derived from it

- Allows a document to be annotated with text that describes the semantic meanings of portions of the document

- Separates the structure of the document from the content

  - The structure denotes the purpose of the document's data

- Use grammars (schemas and DTDs) to define the syntax of the annotations used in a document

- Captures meta-data for a document by marking up the content
