Shadows And Substance The Chemical Weapons Convention:

Shadows And Substance Benoit Morel, Kyle Olson, 1993-08-19 After twenty four years of bilateral and multilateral effort the Conference on Disarmament has sent the Chemical Weapons Convention CWC to the UN General Assembly The signing ceremony in January 1993 launched the process of national ratification with that in mind the contributors to this book address the issues of ratification implementation and verification of the CWC Leading thinkers on chemical weapons control explore the interrelationships among security cost benefit political realignment and verification that are critical to the CWC debate The authors challenge and explore assumptions and ideas represented by the treaty and raise points that need further consideration as the CWC moves toward implementation An Evaluation of the Chemical Weapons Convention and the

U.S. National Interest Jeffery M. Heftman, 1997 **Allies at Odds?** T. Mowle, 2004-10-28 Why despite their similar goals do the policy preferences of the European Union and United States diverge on so many multilateral issues To answer that question *Allies at Odds* thoroughly examines recent international efforts in arms control environmental protection human rights and military cooperation Evidence from 20 separate cases supports the expectations of the realist approach to international politics which focuses on the role of power above all Neither cultural factors nor international institutions have as much influence as some expect This finding was as true during the Clinton Presidency as during the Bush indicating that focusing on personalities overlooks more substantial and longer lasting differences between the Atlantic allies

September 2001 gemacht Julian Perry Robinson: Pioneer in the Prohibition of Chemical and Biological Warfare Henrietta Wilson, Mary Kaldor, Josh Kaldor-Robinson, Peter Pringle, Alexander Ghionis, Richard Guthrie, 2025-11-07 Julian P. Perry Robinson 1941-2020 made a unique contribution to protecting the world from the misuse of chemistry and biology. A trained chemist and patent lawyer, he applied his specialist knowledge to better understand the nature of chemical and biological warfare (CBW) and how best to prevent this. He pioneered open source methods that enabled him to engage with and inform national and international policy making working across the natural and social sciences and with diverse sectors including governments, international organizations and non-governmental research, advocacy and trade groups. His influence can be seen in the achievement and implementation of the Biological Weapons Convention and Chemical Weapons Convention and in his influence on CBW scholarship. This book details his life and work through chapters by people that knew him best: his widow, a close colleague, his son and a dear friend, alongside reprints of a selection of his publications chosen by his research partners, family and friends, and a bibliography of his CBW writings. Delegating State Powers: The Effect of Treaty Regimes on Democracy and Sovereignty Thomas Franck, 2021-10-25 This groundbreaking book deals with problems encountered by the United States in complying with international treaty obligations. It examines the ways in which the American constitutional system sometimes adapts to and sometimes erects barriers against the new system of global solutions to global problems and investigates the resulting challenges on a treaty-by-treaty basis with special attention to such areas as human rights and disarmament. Der Bogen spannt sich von den Prinzipien und Charakteristika des Humanitären Völkerrechts über seine Umsetzung in Krisen und Konfliktgebieten bis hin zu seiner strafrechtlichen Durchsetzung vor den internationalen Straftribunalen für Ruanda und Ex-Jugoslawien. Der Band bietet dem interessierten Laien eine grundlegende Einführung in die Thematik und weist somit zugleich den Charakter eines Handbuchs auf.
