transformation to accommodate geographically relevant perspectives In this light Foundations of Chinese Psychology bridges the gap between western and eastern traditions and elaborates on theories based on local phenomena findings and experiences by research methods that are contextually appropriate Using a guiding principle of cultural psychology one mind many mentalities this book advocates the balancing of a global psychology concept without sacrificing that of a specific locality and people It analyzes the basics of Confucianism and compares them to Western ethical thinking arriving at a series of theories concerning social exchange face achievement motivation organizational behaviors and conflict resolution Beyond the specifics of a particular culture this book exemplifies the act of constructing autonomous social science that may be emulated in other non Western settings It also serves as an excellent guide for cross cultural research as well as a caveat on the limitations of presumptive individualism and exclusionary perspectives Erziehung, Identitätsbildung und Reproduktion im Zaire Patrick V.
