The Essentials of Psychology W. B. Pillsbury, 2015-06-11 Excerpt from The Essentials of Psychology The aim of this volume is to present clearly the accepted facts of psychology Throughout emphasis has been placed upon fact rather than theory Where theories conflict the better one has been chosen the others merely neglected This may seem dogmatic in places but in a text dogmatism is preferable to confusion The point of view is on the whole functional more attention is given to what mind does than to what it is With this goes an emphasis upon the outward manifestations of consciousness and upon the behaviour of others to the subordination of the individual consciousness Nevertheless use is made of the results of structural psychology wherever they throw light upon function or are interesting for themselves The position it is hoped combines the advantages of the rival schools The content of a text book in psychology is sufficiently agreed upon to require no comment The general practice has been followed of introducing a brief exposition of the nervous system and its function This is done with a full appreciation that it is no part of the task of the psychologist to teach neurology but with the conviction that the beginning student in psychology is not likely to have acquired the knowledge elsewhere About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
