Democracy and Development R.C. Bhardwaj, K. Vijayakrishnan, 2018-10-26 Published in 1998 The question of whether democracy and development are allies or adversaries has long been debated and with the triumph of the democratic spirit worldwide the relationship between democracy and development has once again come to attract much attention globally The collapse of the Soviet Union and the developments in Eastern Europe led to considerable rethinking in political circles on the efficacy of the economic policies pursued in those countries and the long term viability of political systems prevalent there Elsewhere several newly industrialized countries are striving to consolidate their gains though there are differing perceptions of whether their politics conform to the classical framework of democracy or not In a remarkable turn around some other countries have initiated measures for economic reforms and structural adjustment setting aside their earlier approaches towards economic management In short the last decades of this millennium have witnessed meaningful efforts worldwide on forging a new partnership between democracy and development In February 1996 the Commonwealth Parliamentary Association jointly organized a conference entitled Parliamentary Democracy and Development Allies or Adversaries with the Wilton Park an international agency of the British Commonwealth and Foreign Office in Wilton House West Sussex United Kingdom The week long conference brought together parliamentarians diplomats administrators political scientists economists and specialists from all over the world The participants shared their views and experiences on diverse aspects of the main theme This publication presents an essentially parliamentary perspective on the correlation between democracy and development based on the discussions at the Wilton Park conference and in the light of current thinking on the subject matter

Changing Public Sector Values Montgomery Van Wart, 2013-10-28 First Published in 1998 The single most important purpose of this book is to create a field of public administration values a field that currently does not exist in a recognizable form Surely values are discussed significantly and usefully by the fields of ethics management decision making

and organization behavior and theory to mention only a few But these discussions are inevitably narrower in scope than is necessary for a true field of values Such a field is needed to help bridge the seeming chasm about discussions of values among the established fields A second purpose of this text is to provide a comprehensive treatment of values A third purpose of the text is to provide a balanced treatment giving all the major schools of thought roughly the same coverage so that their values can be compared as dispassionately as possible A fourth purpose of the book is to make the subject accessible to and interesting for practitioners and students
