McDermott, 2011-07-13 Performance accountability has been the dominant trend in education policy reform since the 1970s State and federal policies set standards for what students should learn require students to take high stakes tests to measure what they have learned and then hold students schools and school districts accountable for their performance. The goal of these policies is to push public school districts to ensure that all students reach a common threshold of knowledge and skills High Stakes Reform analyzes the political processes and historical context that led to the enactment of state level education accountability policies across the country It also situates the education accountability movement in the broader context of public administration research emphasizing the relationships among equity accountability and intergovernmental relations The book then focuses on three in depth case studies of policy development in Massachusetts New Jersey and Connecticut Kathryn McDermott zeroes in on the most controversial and politically charged forms of state performance accountability sanctions including graduation tests direct state intervention in or closing of schools and state takeovers of school districts Public debate casts performance accountability as either a cure for the problems of US public education or a destructive mistake Kathryn McDermott expertly navigates both sides of the debate detailing why particular policies became popular how the assumptions behind the policies influenced the forms they took and what practitioners and scholars can learn from the successes and failures of education accountability policies Encyclopedia of Public Administration and Public Policy: K-Z Jack Rabin, 2003 From the Nuremberg trials to the Civil Service Reform Act of 1978 to recent budget reconciliation bills the Encyclopedia of Public Administration and Public Policy provides detailed coverage of watershed policies and decisions from such fields as privatization biomedical ethics education and diversity This second edition features a wide range of new topics including

Berman, 2008 Sustainability and Environmental Concerns in Transportation 2003 National Research Council (U.S.). Transportation Research Board, 2003 *Grading Education* Richard Rothstein, 2008-12-14 Yes we should hold public schools accountable for effectively spending the vast funds with which they have been entrusted But accountability policies like No Child Left Behind based exclusively on math and reading test scores have narrowed the curriculum misidentified both failing and successful schools and established irresponsible expectations for what schools can accomplish Instead of just grading progress in one or two narrow subjects we should hold schools accountable for the broad outcomes we expect from public education basic knowledge and skills critical thinking an appreciation of the arts physical and emotional health and preparation for skilled employment and then develop the means to measure and ensure schools success in achieving them Grading Education describes a new kind of accountability plan for public education one that relies on higher quality testing focuses on professional evaluation and builds on capacities we already possess This important resource Describes the design of an alternative accountability system that would not corrupt education as does NCLB and its state testing systems Explains the original design of NAEP in the 1960s and shows why it

should be revived Defines the broad goals of education beyond math and reading test scores and reports on surveys to confirm public and governmental support for such goals Relates these broad goals of education to the desire for accountability in education
